

SLC35A5 (K-16): sc-103226

BACKGROUND

SLC35A5 (solute carrier family 35, member A5) is a 424 amino acid multi-pass membrane protein belonging to the nucleotide-sugar transporter family and the SLC35A subfamily. The gene that encodes SLC35A5 contains 21,496 bases and maps to human chromosome 3q13.2. As one of the largest human chromosomes, human chromosome 3 has the lowest rate of segmental duplication in the genome. It also contains a chemokine receptor gene group as well as a number of loci involved in multiple human cancers. 8.8 genes per Mb is the average gene density for chromosome 3, making it one of the more gene-poor chromosomes. Although the average gene density is low, the genes that make up chromosome 3 are larger than average and make up about 49% of the chromosome. A 13.6-cM region on 3p21.31-21.2, where a tumor suppressor gene cluster is located, is believed to be a novel locus for nasopharyngeal carcinoma.

CHROMOSOMAL LOCATION

Genetic locus: SLC35A5 (human) mapping to 3q13.2.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

SOURCE

SLC35A5 (K-16) is an affinity purified rabbit polyclonal antibody raised against a peptide mapping within an internal region of SLC35A5 of human origin.

PRODUCT

Each vial contains 100 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-103226 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

SLC35A5 (K-16) is recommended for detection of SLC35A5 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

SLC35A5 (K-16) is also recommended for detection of SLC35A5 in additional species, including equine.

Suitable for use as control antibody for SLC35A5 siRNA (h): sc-78390, SLC35A5 shRNA Plasmid (h): sc-78390-SH and SLC35A5 shRNA (h) Lentiviral Particles: sc-78390-V.

Molecular Weight of SLC35A5: 49 kDa.

Positive Controls: rat skeletal muscle tissue extract.

DATA

SLC35A5 (K-16): sc-103226. Western blot analysis of SLC35A5 expression in rat skeletal muscle tissue extract.

STORAGE

Store at 4° C, ****DO NOT FREEZE****. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
