# SANTA CRUZ BIOTECHNOLOGY, INC.

# group IID sPLA<sub>2</sub> (C-16): sc-104296

The Power to Question

#### BACKGROUND

Phospholipase A<sub>2</sub>s (PLA<sub>2</sub>s) constitute a family of esterases that hydrolyze the sn-2-acyl ester bond in glycerophospholipid molecules. These enzymes are generally calcium-dependent and have been found both intra- and extracellularly. By hydrolyzing the sn-2 bond in glycerophospholipids, PLA<sub>2</sub>s release fatty acids. One such fatty acid, arachidonic acid, generates the substrates for the initiation of the arachidonic acid cascade that produces various eicosanoids, many of which are potent mediators of inflammation. As a member of the PLA<sub>2</sub> family, group IID sPLA<sub>2</sub>, also known as PLA<sub>2</sub>G2D (phosphatidylcholine 2-acylhydrolase 2D), sPLA<sub>2</sub>-IID or SPLASH, is a 145 amino acid secreted protein that is broadly expressed but found at highest levels in pancreas and spleen. Group IID sPLA<sub>2</sub> catalyzes the reaction of phosphatidylcholine and water into 1-acylglycerophosphocholine and carboxylate, and has been liked to body weight loss in patients with chronic obstructive pulmonary disease (COPD), as well as lymphotoxin deficiency.

#### CHROMOSOMAL LOCATION

Genetic locus: PLA2G2D (human) mapping to 1p36.12.

#### **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

#### SOURCE

group IID sPLA<sub>2</sub> (C-16) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the C-terminus of group IID sPLA<sub>2</sub> of human origin.

## PRODUCT

Each vial contains 200  $\mu g$  IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-104296 P, (100  $\mu$ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

#### **APPLICATIONS**

group IID sPLA<sub>2</sub> (C-16) is recommended for detection of group IID sPLA<sub>2</sub> of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for group IID sPLA<sub>2</sub> siRNA (h): sc-78911, group IID sPLA<sub>2</sub> shRNA Plasmid (h): sc-78911-SH and group IID sPLA<sub>2</sub> shRNA (h) Lentiviral Particles: sc-78911-V.

Molecular Weight of group IID sPLA<sub>2</sub>: 17 kDa.

# **RECOMMENDED SECONDARY REAGENTS**

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker<sup>™</sup> compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker<sup>™</sup> Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluo-rescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz<sup>™</sup> Mounting Medium: sc-24941.

# **STORAGE**

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
