## BACKGROUND

A replicated chromosome includes two kinetochores that control chromosome segregation during mitosis. Centromere protein-A (CENP-A) is a Histone H 3 -like protein that contains a C -terminal H 3 -like domain, required for centromere localization of CENP-A, and an antigenic N-terminal domain. CENP-A, originally isolated from HeLa cells, is essential for kinetochore targeting of CENP-C. In the presence of DNA, CENP-A forms an octameric complex with histones $\mathrm{H} 4, \mathrm{H} 2 \mathrm{~A}$ and H 2 B . CENP-A specifically localizes to active centromeres and is a component of specialized centromeric nucleosomes, on which kinetochores are assembled. CENP-A is essential for nucleosomal packaging of centromeric DNA at interphase and functions as a centromere formation marker on the chromosome.

## CHROMOSOMAL LOCATIONS

Genetic locus: CENPA (human) mapping to 2p23.3; Cenpa (mouse) mapping to 5 B1.

## SOURCE

CENP-A (A-15) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of CENP-A of human origin.

## PRODUCT

Each vial contains $200 \mu \mathrm{glgG}$ in 1.0 ml of PBS with $<0.1 \%$ sodium azide and $0.1 \%$ gelatin.
Blocking peptide available for competition studies, sc-11277 P, ( $100 \mu \mathrm{~g}$ peptide in 0.5 ml PBS containing $<0.1 \%$ sodium azide and $0.2 \% \mathrm{BSA})$.

## STORAGE

Store at $4^{\circ} \mathrm{C},{ }^{* *}$ DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.

## APPLICATIONS

CENP-A (A-15) is recommended for detection of CENP-A of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

CENP-A (A-15) is also recommended for detection of CENP-A in additional species, including canine, bovine, porcine and avian.
Suitable for use as control antibody for CENP-A siRNA (h): sc-37555, CENP-A siRNA (m): sc-37556, CENP-A shRNA Plasmid (h): sc-37555-SH, CENP-A shRNA Plasmid (m): sc-37556-SH, CENP-A shRNA (h) Lentiviral Particles: sc-37555-V and CENP-A shRNA (m) Lentiviral Particles: sc-37556-V.
Molecular Weight of CENP-A: 17 kDa .

## RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat lgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz MarkerT Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:1001:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.
