

Op18 (13): sc-130333

BACKGROUND

Op18 (for oncoprotein 18, also designated stathmin, prosolin or metablastin) is a conserved, tubulin-associated, intracellular phosphoprotein. Many different phosphorylated forms of Op18 are observed, and it is expressed as two different isoforms. Op18 is considered a critical regulator of microtubulin dynamics and is downregulated by p53. It serves as a transducing protein, via phosphorylation, for a variety of cell signaling pathways and is involved in both mitosis and differentiation. Op18 is present in many cancers, including breast carcinomas, and is highly expressed in acute leukemias of different subtypes.

CHROMOSOMAL LOCATION

Genetic locus: STMN1 (human) mapping to 1p36.11.

SOURCE

Op18 (13) is a mouse monoclonal antibody raised against recombinant Op18 of human origin.

PRODUCT

Each vial contains 200 µg IgG₁ in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

STORAGE

Store at 4° C, ****DO NOT FREEZE****. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.

APPLICATIONS

Op18 (13) is recommended for detection of Op18 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)] and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for Op18 siRNA (h): sc-36127, Op18 shRNA Plasmid (h): sc-36127-SH and Op18 shRNA (h) Lentiviral Particles: sc-36127-V.

Molecular Weight of Op18: 19 kDa.

Positive Controls: SK-MEL-28 cell lysate: sc-2236, Jurkat whole cell lysate: sc-2204 or HeLa whole cell lysate: sc-2200.

DATA

Op18 (13): sc-130333. Western blot analysis of human recombinant Op18.

RESEARCH USE

For research use only, not for use in diagnostic procedures.
