YANK2 (F-25): sc-130913

The Power to Question

BACKGROUND

The phosphorylation and dephosphorylation of proteins on serine and threonine residues is an essential means of regulating a broad range of cellular functions in eukaryotes, including cell division, homeostasis and apoptosis. A group of proteins that are intimately involved in this process are the serine/threonine (Ser/Thr) protein kinases. YANK2, also known as STK32B (serine/threonine kinase 32B) or STKG6, is a 414 amino acid protein that contains one protein kinase domain and belongs to the Ser/Thr protein kinase family. Using magnesium as a cofactor, YANK2 functions to catalyze the ATP-dependent phosphorylation of target proteins and may play a role in various signaling events throughout the cell. Multiple isoforms of YANK2 exist due to alternatively splicing events.

CHROMOSOMAL LOCATION

Genetic locus: STK32B (human) mapping to 4p16.2.

SOURCE

YANK2 (F-25) is a purified rabbit polyclonal antibody raised against a peptide mapping near the C-terminus of YANK2 of human origin.

PRODUCT

Each vial contains 100 μg lgG in 1.0 ml PBS with <0.1% sodium azide and 0.1% gelatin.

APPLICATIONS

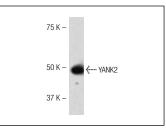

YANK2 (F-25) is recommended for detection of YANK2 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for YANK2 siRNA (h): sc-76940, YANK2 shRNA Plasmid (h): sc-76940-SH and YANK2 shRNA (h) Lentiviral Particles: sc-76940-V.

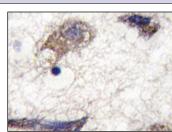

Molecular Weight of YANK2: 48 kDa.

Positive Controls: HL-60 whole cell lysate: sc-2209.

DATA

YANK2 (F-25): sc-130913. Western blot analysis of YANK2 expression in HL-60 whole cell lysate.

YANK2 (F-25): sc-130913. Immunoperoxidase staining of formalin-fixed, paraffin-embedded human brain tissue showing cytoplasmic localization.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.

Try YANK2 (4A7): sc-517186, our highly recommended monoclonal alternative to YANK2 (F-25).
