ZNF396 (Y-23): sc-134188

The Power to Question

BACKGROUND

Zinc-finger proteins contain DNA-binding domains and have a wide variety of functions, most of which encompass some form of transcriptional activation or repression. The majority of zinc-finger proteins contain a Krüppel-type DNA binding domain and a KRAB domain, which is thought to interact with KAP1, thereby recruiting histone modifying proteins. As a member of the krueppel $\rm C_2H_2$ -type zinc-finger protein family, ZNF396 (zinc finger protein 396), also known as ZSCAN14 (zinc finger and SCAN domain-containing protein 14), is a 335 amino acid nuclear protein that contains one SCAN box domain and three $\rm C_2H_2$ -type zinc fingers. There are three isoforms of ZNF that are produced as a result of alternative splicing events. Both isoform 1 and 2 act as DNA-dependent transcriptional repressors. ZNF396 is strongly expressed in liver, moderately expressed in skeletal muscle and weakly expressed in spleen, kidney, prostate and pancreas.

CHROMOSOMAL LOCATION

Genetic locus: ZNF396 (human) mapping to 18q12.2.

SOURCE

ZNF396 (Y-23) is an affinity purified rabbit polyclonal antibody raised against synthetic ZNF396 peptide of human origin.

PRODUCT

Each vial contains 50 μg IgG in 500 μl PBS with < 0.1% sodium azide, 0.1% gelatin and < 0.02% sucrose.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

APPLICATIONS

ZNF396 (Y-23) is recommended for detection of ZNF396 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 μ g per 100-500 μ g of total protein (1 ml of cell lysate)] and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for ZNF396 siRNA (h): sc-76983, ZNF396 shRNA Plasmid (h): sc-76983-SH and ZNF396 shRNA (h) Lentiviral Particles: sc-76983-V.

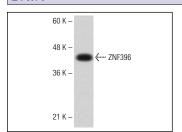

Molecular Weight of ZNF396: 39 kDa.

Positive Controls: Jurkat whole cell lysate: sc-2204.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-rabbit IgG-HRP: sc-2004 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible goat anti-rabbit IgG-HRP: sc-2030 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml).
