

# TPP (H-120): sc-14030

## BACKGROUND

Tristetraprolin (TPP), also known as Nup475 and TIS11, is a zinc-binding protein encoded by the immediate-early response gene, Zfp36. Stimulation of quiescent fibroblasts by mitogens, including platelet derived growth factor and fibroblast growth factor, results in the serine phosphorylation of TPP and the rapid redistribution of the protein from the nucleus to the cytoplasm. *In vitro* studies have demonstrated that TPP is phosphorylated by p42 MAP kinase, indicating that the activity of TPP may be regulated by the MAP kinase pathway *in vivo*. Knockout mice deficient in TPP develop autoimmunity, inflammatory arthritis and dermatitis. These conditions can be reversed by blocking the activity of the inflammatory mediator, tumor necrosis factor- $\alpha$  (TNF $\alpha$ ), suggesting that TPP may function to negatively regulate the expression of TNF $\alpha$ .

## CHROMOSOMAL LOCATION

Genetic locus: ZFP36 (human) mapping to 19q13.2; Zfp36 (mouse) mapping to 7 A3.

## SOURCE

TPP (H-120) is a rabbit polyclonal antibody raised against amino acids 166-285 mapping near the C-terminus of TPP of human origin.

## PRODUCT

Each vial contains 200  $\mu$ g IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

## APPLICATIONS

TPP (H-120) is recommended for detection of TPP of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2  $\mu$ g per 100-500  $\mu$ g of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for TPP siRNA (h): sc-36760, TPP siRNA (m): sc-36761, TPP shRNA Plasmid (h): sc-36760-SH, TPP shRNA Plasmid (m): sc-36761-SH, TPP shRNA (h) Lentiviral Particles: sc-36760-V and TPP shRNA (m) Lentiviral Particles: sc-36761-V.

Molecular Weight of TPP: 44 kDa.

Positive Controls: RAW 309 Cr.1 cell lysate: sc-3814, RAW 309 Cr.1 + LPS cell lysate: sc-24770 or TPP (h): 293T Lysate: sc-178098.

## STORAGE

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

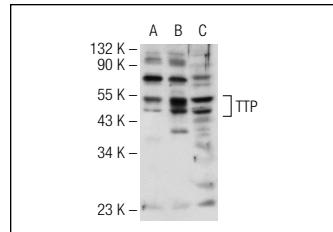

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.

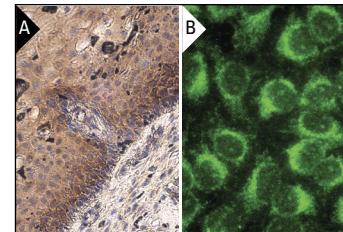

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## DATA

TPP (H-120): sc-14030. Western blot analysis of TPP expression in non-transfected 293T: sc-117752 (**A**), human TPP transfected 293T: sc-178098 (**B**) and RAW 309 Cr.1 (**C**) whole cell lysates.

TPP (H-120): sc-14030. Immunoperoxidase staining of formalin fixed, paraffin-embedded human cervix tissue showing cytoplasmic staining of squamous epithelial cells (**A**). Immunofluorescence staining of methanol-fixed HeLa cells showing cytoplasmic localization (**B**).
