

# GnT-IVH (K-12): sc-161671

## BACKGROUND

GnT-IVH, also known as HGNT-IV-H or MGAT4C (mannosyl ( $\alpha$ -1,3-)-glycoprotein  $\beta$ -1,4-N-acetylglucosaminyltransferase, isozyme C), is a 478 amino acid single-pass type II membrane protein that localizes to the Golgi apparatus and belongs to the glycosyltransferase 54 family. Expressed in liver, heart, testis, brain and adrenal gland, GnT-IVH functions as a glycosyltransferase that catalyzes the transfer of N-acetylglucosamine (GlcNAc) to the core mannose residues of N-linked glycans, thereby playing a crucial role in the production of tri- and tetra-antennary N-linked sugar chains. The gene encoding GnT-IVH maps to human chromosome 12, which encodes over 1,100 genes and comprises approximately 4.5% of the human genome.

## CHROMOSOMAL LOCATION

Genetic locus: MGAT4C (human) mapping to 12q21.31; Mgat4c (mouse) mapping to 10 D1.

## SOURCE

GnT-IVH (K-12) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the C-terminus of GnT-IVH of human origin.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PRODUCT

Each vial contains 200  $\mu$ g IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-161671 P, (100  $\mu$ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

## APPLICATIONS

GnT-IVH (K-12) is recommended for detection of GnT-IVH of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

GnT-IVH (K-12) is also recommended for detection of GnT-IVH in additional species, including equine, canine, bovine, porcine and avian.

Suitable for use as control antibody for GnT-IVH siRNA (h): sc-96198, GnT-IVH siRNA (m): sc-145665, GnT-IVH shRNA Plasmid (h): sc-96198-SH, GnT-IVH shRNA Plasmid (m): sc-145665-SH, GnT-IVH shRNA (h) Lentiviral Particles: sc-96198-V and GnT-IVH shRNA (m) Lentiviral Particles: sc-145665-V.

Molecular Weight of GnT-IVH: 55 kDa.

## RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

## STORAGE

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.
