

ARV1 (E-14): sc-162544

BACKGROUND

ARV1 (ARV1 homolog), also known as hARV1, is a 271 amino acid multi-pass membrane protein that belongs to the ARV1 family. ARV1 contains an N-terminal ARV1 homology domain (AHD), which encompasses a zinc-binding motif and a transmembrane domain, and five central and C-terminal transmembrane domains. Encoded by a gene that maps to human chromosome 1q42.2, ARV1 is conserved in chimpanzee, canine, bovine, mouse, rat, chicken, zebrafish and *Caenorhabditis elegans*, and shares 44% amino acid identity with its yeast homolog. ARV1 plays a role in sphingolipid metabolism, with overexpression likely suppressing lipid metabolic defects. ARV1 may assist with ceramide transport between endoplasmic reticulum and Golgi apparatus, and may also function as a sterol homeostasis mediator.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.

CHROMOSOMAL LOCATION

Genetic locus: Arv1 (mouse) mapping to 8 E2.

SOURCE

ARV1 (E-14) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the N-terminus of ARV1 of mouse origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-162544 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

ARV1 (E-14) is recommended for detection of ARV1 of mouse and rat origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for ARV1 siRNA (m): sc-141281, ARV1 shRNA Plasmid (m): sc-141281-SH and ARV1 shRNA (m) Lentiviral Particles: sc-141281-V.

Molecular Weight of ARV1: 31 kDa.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

RESEARCH USE

For research use only, not for use in diagnostic procedures.
