CRIPAK (W-13): sc-164119

The Power to Question

BACKGROUND

CRIPAK (cysteine-rich PAK1 inhibitor) is a 446 amino acid protein that is upregulated by estrogen and negatively regulates Pak1. Localizing to nucleus, membrane and cytoplasm, CRIPAK is widely expressed with highest levels found in trachea, adrenal gland, prostate and many cancer cell lines. CRIPAK contains an N-terminal C4 zinc finger domain, twelve C3H zinc finger domains, and is encoded by an intronless gene that maps to human chromosome 4p16.3. Chromosome 4 represents approximately 6% of the human genome and contains nearly 900 genes. Notably, the Huntingtin gene, which is found to encode an expanded glutamine tract in cases of Huntington's disease, is on chromosome 4. FGFR-3 is also located on chromosome 4 and has been associated with thanatophoric dwarfism, achondroplasia, Muenke syndrome and bladder cancer. Chromosome 4 is also tied to Ellis-van Creveld syndrome, methylmalonic acidemia and polycystic kidney disease.

CHROMOSOMAL LOCATION

Genetic locus: CRIPAK (human) mapping to 4p16.3.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

SOURCE

CRIPAK (W-13) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the C-terminus of CRIPAK of human origin.

PRODUCT

Each vial contains 200 μg lgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-164119 P, (100 μ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

CRIPAK (W-13) is recommended for detection of CRIPAK of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for CRIPAK siRNA (h): sc-89061, CRIPAK shRNA Plasmid (h): sc-89061-SH and CRIPAK shRNA (h) Lentiviral Particles: sc-89061-V.

Molecular Weight of CRIPAK: 48 kDa.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

RESEARCH USE

For research use only, not for use in diagnostic procedures.
