

OTUD7A (Q-14): sc-165171

BACKGROUND

OTUD7A (OTU domain-containing protein 7A), also known as CEZANNE2, is a 926 amino acid cytoplasmic and nuclear protein that belongs to the peptidase C64 family. OTUD7A contains one A20-type zinc finger, one OTU domain and exists as two alternatively spliced isoforms. Hydrolyzing both linear and branched forms of polyubiquitin, OTUD7A has deubiquitinating activity that is directed towards "Lys-48" or "Lys-63"-linked polyubiquitin chains. The gene that encodes OTUD7A consists of approximately 174,262 bases and maps to human chromosome 15q13.3. Chromosome 15 houses over 700 genes and comprises nearly 3% of the human genome. Angelman and Prader-Willi syndromes are associated with loss of function or deletion of genes in the 15q11-q13 region. Tay-Sachs disease is a lethal disorder associated with mutations of the HEXA gene, which is encoded by chromosome 15, while Marfan syndrome is associated with chromosome 15 through the FBN1 gene.

CHROMOSOMAL LOCATION

Genetic locus: OTUD7A (human) mapping to 15q13.3; Otud7a (mouse) mapping to 7 C.

SOURCE

OTUD7A (Q-14) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the C-terminus of OTUD7A of human origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-165171 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

OTUD7A (Q-14) is recommended for detection of OTUD7A of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000); non cross-reactive with OTUD7B.

OTUD7A (Q-14) is also recommended for detection of OTUD7A in additional species, including bovine and porcine.

Suitable for use as control antibody for OTUD7A siRNA (h): sc-90013, OTUD7A siRNA (m): sc-151944, OTUD7A shRNA Plasmid (h): sc-90013-SH, OTUD7A shRNA Plasmid (m): sc-151944-SH, OTUD7A shRNA (h) Lentiviral Particles: sc-90013-V and OTUD7A shRNA (m) Lentiviral Particles: sc-151944-V.

Molecular Weight of OTUD7A: 101 kDa.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker[™] compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker[™] Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz[™] Mounting Medium: sc-24941.

STORAGE

Store at 4° C, ****DO NOT FREEZE****. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
