

# MGC29506 (T-13): sc-168605

## BACKGROUND

MGC29506, also known as MZB1 (marginal zone B and B1 cell-specific protein), PACAP (proapoptotic caspase adapter protein) or plasma cell-induced resident endoplasmic reticulum protein, is a 189 amino acid protein that exists as five alternatively spliced isoforms. MGC29506 isoform 1 has been found to localize to the endoplasmic reticulum, while isoform 2 localizes to the cytoplasm surrounding the nucleus. A member of the PERP1 family, MGC29506 promotes IgM assembly and secretion and is widely expressed, with highest levels found in brain, thymus, spleen and small intestine. The gene encoding MGC29506 maps to human chromosome 5q31.2.
