Dlx-5 (Y-20): sc-18151

The Power to Overtin

BACKGROUND

Dlx genes are a highly conserved family of six different (Dlx1–6) homeo box-containing genes that share homology with distal-less (DlI), a gene expressed in the head and limbs of the developing fruit fly. Dlx genes are expressed in spatially and temporally restricted patterns in craniofacial primordia, basal telencephalon and diencephalon, and in distal regions of extending appendages, including the limb and the genital bud. The differential expression of Dlx influences patterning, morphogenesis and histogenesis in these tissues. The Dlx gene products can activate transcription and are localized primarily to the nucleus, although Dlx-5 can be found in the cytoplasm. Dlx proteins influence different stages of proper tissue development, including patterning of the orofacial skeleton (craniofacial ectomesenchyme) and differentiation of structures within and between teeth.

CHROMOSOMAL LOCATION

Genetic locus: DLX5 (human) mapping to 7q21.3; Dlx5 (mouse) mapping to 6 A1.

SOURCE

Dlx-5 (Y-20) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of Dlx-5 of human origin.

PRODUCT

Each vial contains 200 μg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. Also available as TransCruz reagent for Gel Supershift and ChIP applications, sc-18151 X, 200 μg /0.1 ml.

Blocking peptide available for competition studies, sc-18151 P, (100 μ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

DIx-5 (Y-20) is recommended for detection of DIx-5 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 μ g per 100-500 μ g of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000)

Dlx-5 (Y-20) is also recommended for detection of Dlx-5 in additional species, including equine, canine, bovine and porcine.

Suitable for use as control antibody for Dlx-5 siRNA (h): sc-38657, Dlx-5 siRNA (m): sc-38658, Dlx-5 shRNA Plasmid (h): sc-38657-SH, Dlx-5 shRNA Plasmid (m): sc-38658-SH, Dlx-5 shRNA (h) Lentiviral Particles: sc-38657-V and Dlx-5 shRNA (m) Lentiviral Particles: sc-38658-V.

DIx-5 (Y-20) X TransCruz antibody is recommended for Gel Supershift and ChIP applications.

Molecular Weight of Dlx-5: 35 kDa.

Positive Controls: rat placenta extract: sc-364808.

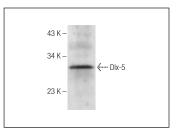

RESEARCH USE

For research use only, not for use in diagnostic procedures.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

DATA

Dlx-5 (Y-20): sc-18151. Western blot analysis of Dlx-5 expression in rat placenta tissue extract.
