

MAcCAM-1 (MECA-367): sc-19604

BACKGROUND

The recirculation of lymphocytes through different organs is thought to be regulated by adhesion molecules ("homing receptors") recognizing tissue-specific vascular addressins on the endothelium. The mucosal vascular addressin, MAcCAM-1 (mucosal addressin cell adhesion molecule 1), is an immunoglobulin superfamily adhesion molecule for lymphocytes that is expressed by mucosal venules and helps direct lymphocyte traffic into Peyer's patches and the intestinal lamina propria. MAcCAM-1 acts as an endothelial cell ligand for leukocyte homing receptors L-Selectin and Integrin $\alpha 4/\beta 7$. MAcCAM-1 is strongly expressed on inflamed portal vein/sinusoidal endothelium in autoimmune-mediated liver disease and plays a major contributory role in the progression of chronic experimental autoimmune encephalomyelitis.

CHROMOSOMAL LOCATION

Genetic locus: MADCAM1 (human) mapping to 19p13.3; Madcam1 (mouse) mapping to 10 C1.

SOURCE

MAcCAM-1 (MECA-367) is a rat monoclonal antibody raised against endothelial cells from BALB/c mouse mesenteric and peripheral lymph nodes.

PRODUCT

Each vial contains 200 μ g IgG_{2a} in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. Also available azide-free for blocking, sc-19604 L, 200 μ g/0.1 ml.

MAcCAM-1 (MECA-367) is available conjugated to either phycoerythrin (sc-19604 PE) or fluorescein (sc-19604 FITC), 200 μ g/ml, for IF, IHC(P) and FCM.

APPLICATIONS

MAcCAM-1 (MECA-367) is recommended for detection of MAcCAM-1 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 μ g per 100-500 μ g of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and flow cytometry (1 μ g per 1×10^6 cells).

Suitable for use as control antibody for MAcCAM-1 siRNA (h): sc-43037, MAcCAM-1 siRNA (m): sc-43038, MAcCAM-1 shRNA Plasmid (h): sc-43037-SH, MAcCAM-1 shRNA Plasmid (m): sc-43038-SH, MAcCAM-1 shRNA (h) Lentiviral Particles: sc-43037-V and MAcCAM-1 shRNA (m) Lentiviral Particles: sc-43038-V.

Molecular Weight (predicted) of MAcCAM-1 isoforms: 40/29 kDa.

Molecular Weight (observed) of MAcCAM-1: 29/40/55-60 kDa.

Positive Controls: MAcCAM-1 (m): 293T Lysate: sc-121483, ECV304 cell lysate: sc-2269 or rat spleen extract: sc-2397.

DATA

MAcCAM-1 (MECA-367): sc-19604. Western blot analysis of MAcCAM-1 expression in non-transfected: sc-117752 (A) and truncated mouse MAcCAM-1 transfected: sc-121483 (B) 293T whole cell lysates.

MAcCAM-1 (MECA-367): sc-19604. Western blot analysis of MAcCAM-1 expression in ECV304 whole cell lysate.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.
