## SANTA CRUZ BIOTECHNOLOGY, INC.

# Integrin β2 (GAME-46): sc-19624

# BACKGROUND

Integrins are heterodimers composed of noncovalently associated transmembrane  $\alpha$  and  $\beta$  subunits. The 16  $\alpha$  and 8  $\beta$  subunits heterodimerize to produce more than 20 different receptors. Most integrin receptors bind ligands that are components of the extracellular matrix, including Fibronectin, Collagen and Vitronectin. Certain integrins can also bind to soluble ligands such as fibrinogen, or to counterreceptors on adjacent cells such as the intracellular adhesion molecules (ICAMs), leading to adjacent integrin receptors; both receptor cluster integrins by binding to adjacent integrin receptors; both receptor clustering and ligand occupancy are necessary for the activation of integrinmediated responses. In addition to mediating cell adhesion and cytoskeletal organization, integrins function as signaling receptors. Signals transduced by integrins play a role in many biological processes, including cell growth, differentiation, migration and apoptosis.

#### CHROMOSOMAL LOCATION

Genetic locus: Itgb2 (mouse) mapping to 10 C1.

#### SOURCE

Integrin  $\beta 2$  (GAME-46) is a rat monoclonal antibody raised against Integrin  $\beta 2$  from mouse T-cell hybridoma TAM8C41.

#### STORAGE

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

#### **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

### PRODUCT

Each vial contains 200  $\mu g$  lgG $_1$  in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. Also available azide-free for blocking, sc-19624 L, 200  $\mu g/0.1$  ml.

Integrin  $\beta$ 2 (GAME-46) is available conjugated to either phycoerythrin (sc-19624 PE) or fluorescein (sc-19624 FITC), 200 µg/ml, for WB (RGB), IF, IHC(P) and FCM.

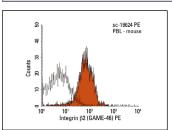

## **APPLICATIONS**

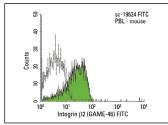

Integrin  $\beta$ 2 (GAME-46) is recommended for detection of Integrin  $\beta$ 2 of mouse origin by immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and flow cytometry (1 µg per 1 x 10<sup>6</sup> cells).

Suitable for use as control antibody for Integrin  $\beta 2$  siRNA (m): sc-35676, Integrin  $\beta 2$  shRNA Plasmid (m): sc-35676-SH and Integrin  $\beta 2$  shRNA (m) Lentiviral Particles: sc-35676-V.

Molecular Weight of Integrin β2: 95 kDa.

#### DATA

Integrin  $\beta 2$  (GAME-46) PE: sc-19624 PE. FCM analysis of mouse peripheral blood leukocytes. Black line histogram represents the isotype control, normal rat  $lgG_1\text{-PE}$ : sc-2871.

Integrin  $\beta$ 2 (GAME-46) FITC: sc-19624 FITC. FCM analysis of mouse peripheral blood leukocytes. Black line histogram represents the isotype control, normal rat IgG<sub>1</sub>-FITC: sc-2827.
