# SEBOX (P-19): sc-244101

The Power to Question

#### **BACKGROUND**

SEBOX is a 216 amino acid protein that belongs to the paired homeobox family. The human SEBOX protein contains a central homeodomain and shares 63% amino acid identity with mouse Sebox. Homeodomain proteins, such as SEBOX, play a key role in coordinating gene expression during development. Localizing to nucleus, SEBOX is a probable transcription factor involved in the control of specification of mesoderm and endoderm. SEBOX is the only member of the Sebox gene family in the human genome. Compared with mouse Sebox, the human protein has substitutions at the normally invariant residues asn51 and arg53, suggesting it may be nonfunctional. Sebox expression has been detected in adult mouse brain, skin, ovary and liver. Containing three exons, the SEBOX gene is conserved in dog, cow, mouse, rat and zebrafish, and maps to human chromosome 17q11.2.

#### **CHROMOSOMAL LOCATION**

Genetic locus: Sebox (mouse) mapping to 11 B5.

### **SOURCE**

SEBOX (P-19) is an affinity purified goat polyclonal antibody raised against a peptide mapping at the N-terminus of SEBOX of mouse origin.

## **PRODUCT**

Each vial contains 200  $\mu g$  lgG in 1.0 ml of PBS with <0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-244101 P, (100  $\mu$ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

Available as TransCruz reagent for Gel Supershift and ChIP applications, sc-244101 X, 200  $\mu g/0.1$  ml.

#### **APPLICATIONS**

SEBOX (P-19) is recommended for detection of SEBOX of mouse and rat origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

SEBOX (P-19) is also recommended for detection of SEBOX in additional species, including equine.

Suitable for use as control antibody for SEBOX siRNA (m): sc-153293, SEBOX shRNA Plasmid (m): sc-153293-SH and SEBOX shRNA (m) Lentiviral Particles: sc-153293-V.

SEBOX (P-19) X TransCruz antibody is recommended for Gel Supershift and ChIP applications.

Molecular Weight of SEBOX: 23 kDa.

## **RECOMMENDED SECONDARY REAGENTS**

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

## **STORAGE**

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

#### **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

#### **PROTOCOLS**

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
