

VSTM2A (V-15): sc-244595

BACKGROUND

Chromosome 7 is about 158 million bases long, encodes over 1,000 genes and makes up about 5% of the human genome. Chromosome 7 has been linked to osteogenesis imperfecta, Pendred syndrome, lissencephaly, citrullinemia and Shwachman-Diamond syndrome. The deletion of a portion of the q arm of chromosome 7 is associated with Williams-Beuren syndrome, a condition characterized by mild mental retardation, an unusual comfort and friendliness with strangers and an elfin appearance. Deletions of portions of the q arm of chromosome 7 are also seen in a number of myeloid disorders including cases of acute myelogenous leukemia and myelodysplasia. The VSTM2A gene product has been provisionally designated VSTM2A pending further characterization.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

CHROMOSOMAL LOCATION

Genetic locus: VSTM2A (human) mapping to 7p11.2; Vstm2a (mouse) mapping to 11 A2.

SOURCE

VSTM2A (V-15) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of VSTM2A of human origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-244595 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

VSTM2A (V-15) is recommended for detection of VSTM2A of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000); non cross-reactive with other VSTM family members.

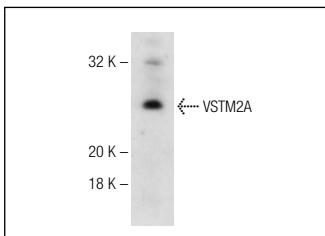

VSTM2A (V-15) is also recommended for detection of VSTM2A in additional species, including equine, canine, bovine, porcine and avian.

Suitable for use as control antibody for VSTM2A siRNA (h): sc-89396, VSTM2A siRNA (m): sc-155232, VSTM2A shRNA Plasmid (h): sc-89396-SH, VSTM2A shRNA Plasmid (m): sc-155232-SH, VSTM2A shRNA (h) Lentiviral Particles: sc-89396-V and VSTM2A shRNA (m) Lentiviral Particles: sc-155232-V.

Molecular Weight of VSTM2A: 26 kDa.

Positive Controls: BE (2)-M17 whole cell lysate.

DATA

VSTM2A (V-15): sc-244595. Western blot analysis of VSTM2A expression in BE (2)-M17 whole cell lysate.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
