# FMR1NB (S-15): sc-246953

The Power to Question

## **BACKGROUND**

FMR1NB (fragile X mental retardation 1 neighbor), also referred to as CT37 (cancer/testis antigen 37), NYSAR35 or NY-SAR-35, is a 255 amino acid multipass membrane protein that is expressed in melanoma, sarcoma, lung, breast, bladder, esophageal and ovarian cancers. FMR1NB contains one P-type (trefoil) domain. The P-type (trefoil) motif is a three-looped clover leaf domain consisting of approximately 38 amino acids in length in which the loops are held together by six highly conserved disulfide bonds. P-type (trefoil) domains are commonly associated with both diseased and normal mucus-secreting epithelia. FMR1NB is encoded by a gene located on human chromosome X, which contains nearly 153 million base pairs and houses over 1,000 genes. In conjunction with chromosome Y, chromosome X is responsible for sex determination. There are a number of conditions related to an abnormal number and combination of sex chromosomes, some of which include Turner's syndrome, color blindness, hemophilia and Duchenne muscular dystrophy.

## CHROMOSOMAL LOCATION

Genetic locus: Fmr1nb (mouse) mapping to X A7.1.

## **SOURCE**

FMR1NB (S-15) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an N-terminal cytoplasmic domain of FMR1NB of mouse origin.

# **PRODUCT**

Each vial contains 200  $\mu g$  lgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-246953 P, (100  $\mu$ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

#### **APPLICATIONS**

FMR1NB (S-15) is recommended for detection of FMR1NB of mouse and rat origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000)

Suitable for use as control antibody for Fmr1nb siRNA (m): sc-145208, Fmr1nb shRNA Plasmid (m): sc-145208-SH and Fmr1nb shRNA (m) Lentiviral Particles: sc-145208-V.

Molecular Weight of FMR1NB: 29 kDa.

#### **RECOMMENDED SECONDARY REAGENTS**

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

# **STORAGE**

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

# **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

# **PROTOCOLS**

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
