

LYPD5 (P-18): sc-247921

BACKGROUND

LYPD5 (LY6/PLAUR domain containing 5), also known as PRO4356, is a 251 amino acid membrane protein that contains one UPAR/Ly6 domain and belongs to the Ly-6 superfamily. Members of the Ly-6 family contain an LU domain, which consists of approximately 80 amino acids and is characterized by a conserved pattern of 10 cysteine residues. Existing as two alternatively spliced isoforms and localizing to the cytoplasm, LYPD5 is encoded by a gene located on human chromosome 19q13.33. Chromosome 19 consists of approximately 63 million bases and makes up over 2% of human genomic DNA. Chromosome 19 is recognized for having the greatest gene density of the human chromosomes and it is the genetic home for a number of immunoglobulin (Ig) superfamily members, including the killer cell and leukocyte Ig-like receptors, a variety of ICAMs, the CEACAM and PSG families and Fc receptors (FcRs).

CHROMOSOMAL LOCATION

Genetic locus: LYPD5 (human) mapping to 19q13.31; Lypd5 (mouse) mapping to 7 A3.

SOURCE

LYPD5 (P-18) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of LYPD5 of human origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-247921 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

LYPD5 (P-18) is recommended for detection of LYPD5 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000); non cross-reactive with other LYPD family members.

Suitable for use as control antibody for LYPD5 siRNA (h): sc-97141, LYPD5 siRNA (m): sc-149178, LYPD5 shRNA Plasmid (h): sc-97141-SH, LYPD5 shRNA Plasmid (m): sc-149178-SH, LYPD5 shRNA (h) Lentiviral Particles: sc-97141-V and LYPD5 shRNA (m) Lentiviral Particles: sc-149178-V.

Molecular Weight of LYPD5 isoforms: 27/22 kDa.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
