

chordin (H-300): sc-28964

BACKGROUND

The patterning of the CNS relies on the interaction of multiple signaling molecules such as Sonic Hedgehog, Wnts and BMPs and their antagonists chordin and Noggin. At midgastrula, expression of Noggin overlaps that of chordin. Chordin is a key developmental protein that dorsalizes early vertebrate embryonic tissues by binding to ventralizing TGF β -like bone morphogenetic proteins and sequestering them in latent complexes. Chordin dorsalizes early vertebrate embryonic tissues by binding to bone morphogenetic proteins and sequestering them in latent complexes. The gene which encodes chordin maps to human chromosome 3q27. Noggin is a secreted protein that binds and inactivates members of the TGF β superfamily of signaling proteins, such as BMP-2,4,7. The gene which encodes Noggin maps to human chromosome 17q22.

CHROMOSOMAL LOCATION

Genetic locus: CHR (human) mapping to 3q27.1; Chrd (mouse) mapping to 16 B1.

SOURCE

chordin (H-300) is a rabbit polyclonal antibody raised against amino acids 656-955 mapping at the C-terminus of chordin of human origin.

PRODUCT

Each vial contains 200 μ g IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

APPLICATIONS

chordin (H-300) is recommended for detection of chordin of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 μ g per 100-500 μ g of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

chordin (H-300) is also recommended for detection of chordin in additional species, including equine, canine, bovine and porcine.

Suitable for use as control antibody for chordin siRNA (h): sc-42136, chordin siRNA (m): sc-42137, chordin shRNA Plasmid (h): sc-42136-SH, chordin shRNA Plasmid (m): sc-42137-SH, chordin shRNA (h) Lentiviral Particles: sc-42136-V and chordin shRNA (m) Lentiviral Particles: sc-42137-V.

Molecular Weight of chordin: 120 kDa.

Positive Controls: rat liver extract: sc-2395 or Hep G2 cell lysate: sc-2227.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-rabbit IgG-HRP: sc-2004 (dilution range: 1:2000-1:100,000) or Cruz Marker[™] compatible goat anti-rabbit IgG-HRP: sc-2030 (dilution range: 1:2000-1:5000), Cruz Marker[™] Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml). 3) Immunofluorescence: use goat anti-rabbit IgG-FITC: sc-2012 (dilution range: 1:100-1:400) or goat anti-rabbit IgG-TR: sc-2780 (dilution range: 1:100-1:400) with UltraCruz[™] Mounting Medium: sc-24941.
