SANTA CRUZ BIOTECHNOLOGY, INC.

NCCT (H-70): sc-292793

SANTA CRUZ BIOTECHNOLOGY

The Power to Question

BACKGROUND

NCCT (Na-Cl cotransporter), also known as NCC, TSC (thiazide-sensitive sodium-chloride cotransporter) or SLC12A3 (solute carrier family 12 (sodium/chloride transporters), member 3), is a 1,021 amino acid cell membrane protein that is predominately expressed in kidney. Belonging to the SLC12A transporter family, NCCT plays an important role in renal sodium reabsorption, functioning as a renal thiazide-sensitive sodium-chloride cotransporter. Mutations to the NCCT gene are the cause of Gitelman syndrome, an autosomal recessive disorder characterized by hypokalemic alkalosis combined with hypomagnesemia, low urinary calcium, and increased renin activity associated with normal blood pressure.

CHROMOSOMAL LOCATION

Genetic locus: SLC12A3 (human) mapping to 16q13; Slc12a3 (mouse) mapping to 8 C5.

SOURCE

NCCT (H-70) is a rabbit polyclonal antibody raised against amino acids 279-348 mapping within an internal region of NCCT of human origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

APPLICATIONS

NCCT (H-70) is recommended for detection of NCCT of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

NCCT (H-70) is also recommended for detection of NCCT in additional species, including equine, canine and bovine.

Suitable for use as control antibody for NCCT siRNA (h): sc-42515, NCCT siRNA (m): sc-42516, NCCT shRNA Plasmid (h): sc-42515-SH, NCCT shRNA Plasmid (m): sc-42516-SH, NCCT shRNA (h) Lentiviral Particles: sc-42515-V and NCCT shRNA (m) Lentiviral Particles: sc-42516-V.

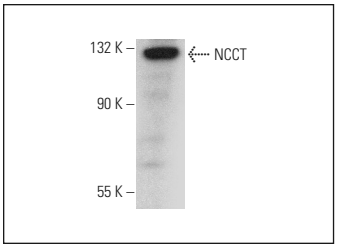
Molecular Weight of NCCT: 114 kDa.

Positive Controls: mouse brain extract: sc-2253.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-rabbit IgG-HRP: sc-2004 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible goat anti-rabbit IgG-HRP: sc-2030 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml). 3) Immunofluorescence: use goat anti-rabbit IgG-FITC: sc-2012 (dilution range: 1:100-1:400) or goat anti-rabbit IgG-TR: sc-2780 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

DATA



NCCT (H-70): sc-292793. Western blot analysis of NCCT expression in mouse brain tissue extract.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
