Sprouty 3 (H-95): sc-30050

SANTA CRUZ BIOTECHNOLOGY
The Power to Question

BACKGROUND

Members of the Sprouty family (Sprouty 1-4) are inducible negative regulators of growth factors that act through tyrosine kinase receptors. Mammalian Sprouty homologs share a well-conserved cysteine-rich carboxy-terminal domain with their *Drosophila* counterparts. Sprouty proteins are cytoplasmic in unstimulated cells, but in cells stimulated by growth factors they anchor to the plasma membrane by palmitoylation. Sprouty 1 and 2 associate with caveolin-1 in perinuclear and vesicular structures and are phosphorylated on serine residues. Sprouty 2 can associate with c-Cbl, a downregulator of RTK signaling, and inhibit the activities of several growth factors. Unlike the widely expressed Sprouty members 1, 2 and 4, Sprouty 3 expression is restricted to adult brain and testis. Sprouty 4 is a target of the WNT/β-catenin signaling pathway in progenitor cells. In conclusion, members of Sprouty inhibit FGF and VEGF-mediated cell proliferation, suggesting that they may regulate angiogenesis in normal and disease processes.

CHROMOSOMAL LOCATION

Genetic locus: Spry3 (mouse) mapping to X A1.1.

SOURCE

Sprouty 3 (H-95) is a rabbit polyclonal antibody raised against amino acids 1-95 mapping at the N-terminus of Sprouty 3 of human origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

APPLICATIONS

Sprouty 3 (H-95) is recommended for detection of Sprouty 3 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Sprouty 3 (H-95) is also recommended for detection of Sprouty 3 in additional species, including equine, canine, bovine and porcine.

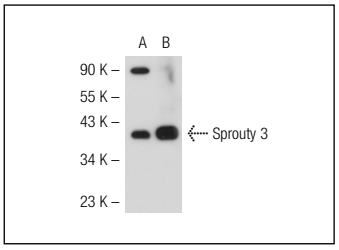
Suitable for use as control antibody for Sprouty 3 siRNA (h): sc-41039, Sprouty 3 siRNA (m): sc-41040, Sprouty 3 shRNA Plasmid (h): sc-41039-SH, Sprouty 3 shRNA Plasmid (m): sc-41040-SH, Sprouty 3 shRNA (h) Lentiviral Particles: sc-41039-V and Sprouty 3 shRNA (m) Lentiviral Particles: sc-41040-V.

Molecular Weight (predicted) of Sprouty 3: 31 kDa.

Molecular Weight (observed) of Sprouty 3: 36-43 kDa.

Positive Controls: HeLa whole cell lysate: sc-2200 or JEG-3 whole cell lysate: sc-364255.

DATA



Sprouty 3 (H-95): sc-30050. Western blot analysis of Sprouty 3 expression in HeLa (**A**) and JEG-3 (**B**) whole cell lysates.
