

# GCL (H-60): sc-32927

## BACKGROUND

Germ cell-less (GCL) represses transcription during the later stages of spermatogenesis both in *Drosophila* and mammalian species. GCL localizes to the nuclear envelope, where it competes with BAF to interact with Emerin, a complex that is required for appropriate gene expression. Defective sperm motility as well as impaired nuclear envelope integrity in liver, pancreas and testis cells result from a lack of GCL gene expression. Thus it appears that the essential function of GCL is to facilitate normal nuclear-lamina organization, which results in normal sperm morphogenesis and chromatin remodeling.

## CHROMOSOMAL LOCATION

Genetic locus: GMCL1 (human) mapping to 2p13.3; Gmcl1 (mouse) mapping to 6 D1.

## SOURCE

GCL (H-60) is a rabbit polyclonal antibody raised against amino acids 457-511 mapping near the C-terminus of GCL of human origin.

## PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

## STORAGE

Store at 4° C, **\*\*DO NOT FREEZE\*\***. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.

## APPLICATIONS

GCL (H-60) is recommended for detection of GCL of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

GCL (H-60) is also recommended for detection of GCL in additional species, including equine, canine, bovine, porcine and avian.

Suitable for use as control antibody for GCL siRNA (h): sc-72182, GCL siRNA (m): sc-72183, GCL shRNA Plasmid (h): sc-72182-SH, GCL shRNA Plasmid (m): sc-72183-SH, GCL shRNA (h) Lentiviral Particles: sc-72182-V and GCL shRNA (m) Lentiviral Particles: sc-72183-V.

Molecular Weight of GCL: 60 kDa.

Positive Controls: human liver extract: sc-363766, HeLa whole cell lysate: sc-2200 or mouse testis extract: sc-2405.

## RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-rabbit IgG-HRP: sc-2004 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible goat anti-rabbit IgG-HRP: sc-2030 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml). 3) Immunofluorescence: use goat anti-rabbit IgG-FITC: sc-2012 (dilution range: 1:100-1:400) or goat anti-rabbit IgG-TR: sc-2780 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

## DATA

GCL (H-60): sc-32927. Western blot analysis of GCL expression in mouse testis tissue extract.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

Try **GCL (B-4): sc-271330**, our highly recommended monoclonal alternative to GCL (H-60).
