Scour Bos™ 9

Novartis

Bovine Rota-Coronavirus Vaccine

Killed Virus

Clostridium Perfringens Type C-Escherichia Coli Bacterin-Toxoid

(For Veterinary Use Only)

Composition: This product contains inactivated cultures of bovine rotavirus, bovine coronavirus, Clostridium perfringens Type C, and K99 piliated Escherichia coli adjuvanted with Xtend® III. Contains amphotericin B, gentamicin, and thimerosal as preservatives.

Directions and Dosage: Shake well before using. Administer 2 mL intramuscularly in the neck 8–16 weeks prior to calving. Revaccinate with Scour Bos™ 4 (Bovine Rota-Coronavirus Vaccine) 4 weeks prior to calving. Revaccinate with one dose of (Scour Bos™ 9) 8–10 weeks prior to each subsequent calving.

Precautions: Store out of direct sunlight at 2°-7°C (35°-45°F). DO NOT FREEZE. Use entire contents when first opened. Do not vaccinate within 60 days prior to slaughter. It is essential that newborn calves receive colostrum from the vaccinated dam.

Warning: THIS PRODUCT MAY CAUSE PERSISTENT SWELLING AT THE SITE OF INJECTION. Anaphylactic reactions may occur following the use of this biological.

Symptomatic treatment: Epinephrine.
