LYMEVAX®

Fort Dodge

Borrelia Burgdorferi Bacterin

For Use in Dogs Only

For vaccination of healthy dogs 9 weeks of age or older as an aid in the prevention of the disease caused by *Borrelia burgdorferi*.

DOSE: Dogs, inject one 1 mL dose subcutaneously using aseptic technique. A second dose should be administered 2 to 3 weeks later. Annual revaccination with one dose is recommended.

INFOVAX-ID® System

The **INFOVAX-ID** System provides a simple and effective method of recording pertinent information on the vaccines administered to animals in a veterinary practice.

For vaccines requiring reconstitution, remove label from both vials and affix both labels to the animal's medical chart.

Using the INFOVAX-ID® System:

1.	Grasp the lower right hand corner of the tab at the arrow marked "Peel Here" between your thumb and forefinger (figure 1) .	 (figure 1)
2.	Pull steadily at a slight upward angle until the top portion of the label is separated from the vial (figure 2) .	 (figure 2)
3.	Place the label on the animal's medical chart. Press down on the label to ensure adhesion.	

CAUTION: Store in dark at 2° to 7°C (35° to 45°F). AVOID FREEZING. SHAKE WELL. In case of anaphylactoid reaction, administer epinephrine.

Thimerosal added as a preservative.

For Veterinary Use Only

Made under license from MGI PHARMA, INC.

CAUTION: In the absence of a veterinarian-client-patient relationship, Federal law prohibits the relabeling, repackaging, resale, or redistribution of the individual contents of this package. (9 CFR 112.6)
