# SANTA CRUZ BIOTECHNOLOGY, INC.

# Streptavidin (3521): sc-58198

## BACKGROUND

Streptavidin is a tetrameric protein purified from *Streptomyces avidinii* that binds very tightly to the vitamin biotin with one of the strongest known biological and noncovalent interactions. Each monomer of Streptavidin binds one molecule of biotin. The strong Streptavidin-biotin bond can be used to "glue" various chemicals onto surfaces and to link together molecules such as radio-isotopes and monoclonal antibodies. Streptavidin is widely utilized in scientific laboratories, commonly for the purification of immunochemistries. It is one of the most important components in diagnostics and laboratory kits.

# SOURCE

Streptavidin (3521) is a mouse monoclonal antibody raised against Streptavidin of *Streptomyces avidinii* origin.

#### PRODUCT

Each vial contains 100  $\mu g~lgG_1$  in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

#### STORAGE

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

#### PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.

#### APPLICATIONS

Streptavidin (3521) is recommended for detection of Streptavidin origin by Western Blotting (starting dilution to be determined by researcher, dilution range 1:10-1:100); permits the formation of antibody-Streptavidin complexes, thus enhancing the sensitivity of the detection system; non cross-reactive with Avidin.

Molecular Weight of Streptavidin: 24 kDa.

# **RESEARCH USE**

For research use only, not for use in diagnostic procedures.
