# RGS9-1 (D7): sc-59677

The Power to Question

## **BACKGROUND**

The vision system comprises a cascade of complex biochemical reactions that each contain numerous steps taking place in a matter of nanoseconds. RGS represents a family of GTPase accelerating proteins (GAPs) which play important roles in the vision system pathways. RGS9 is a member of this family and is the main source of GAP activity in the rod outer segments. RGS9-1 is an isoform of RGS9 that is found predominately in vertebrate cone and rod photoreceptors, and is required for rapid recovery of the light response in these locations. RGS9-1 is a peripheral protein of the disk membranes that binds membranes very tightly. R9AP binds to the N-terminal domain of RGS9-1 and anchors it to the disk membrane through a C-terminal transmembrane helix. RGS9-1 is phosphorylated by protein kinase A in a mechanism that may be responsible for mediating a stronger photoresponse in dark-adapted cells.

# CHROMOSOMAL LOCATION

Genetic locus: Rgs9 (mouse) mapping to 11 E1.

## **SOURCE**

RGS9-1 (D7) is a mouse monoclonal antibody raised against full length RGS9-1 mouse origin.

## **PRODUCT**

Each vial contains 200  $\mu g$   $lgG_1$  kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

#### **APPLICATIONS**

RGS9-1 (D7) is recommended for detection of RGS9-1 of mouse and rat origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2  $\mu$ g per 100-500  $\mu$ g of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

RGS9-1 (D7) is also recommended for detection of RGS9-1 in additional species, including bovine.

Suitable for use as control antibody for RGS9 siRNA (m): sc-36413, RGS9 shRNA Plasmid (m): sc-36413-SH and RGS9 shRNA (m) Lentiviral Particles: sc-36413-V.

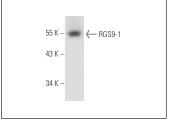

Molecular Weight of RGS9-1: 55 kDa.

Positive Controls: PC-12 cell lysate: sc-2250.

## **RECOMMENDED SUPPORT REAGENTS**

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-lgG $\kappa$  BP-HRP: sc-516102 or m-lgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker<sup>TM</sup> Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml). 3) Immunofluorescence: use m-lgG $\kappa$  BP-FITC: sc-516140 or m-lgG $\kappa$  BP-PE: sc-516141 (dilution range: 1:50-1:200) with UltraCruz® Mounting Medium: sc-24941 or UltraCruz® Hard-set Mounting Medium: sc-359850.

#### **DATA**

RGS9-1 (D7): sc-59677. Western blot analysis of RGS9-1 expression in PC-12 whole cell lysate under non-reducing conditions.

#### **STORAGE**

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

# **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

## **PROTOCOLS**

See our web site at www.scbt.com for detailed protocols and support products.
