# ZW10 (C-17): sc-66691

The Power to Question

#### **BACKGROUND**

ZW10 is the human homolog of the *Drosophila melanogaster* Zw10 protein and is involved in proper chromosome segregation and kinetochore function during cell division. An essential component of the mitotic checkpoint, ZW10 binds to centromeres during prophase and anaphase and to kinetochrore microtubules during metaphase, thereby preventing the cell from prematurely exiting mitosis. ZW10 localization varies throughout the cell cycle, beginning in the cytoplasm during interphase, then moving to the kinetochore and spindle midzone during metaphase and late anaphase, respectively. A widely expressed protein, ZW10 is also involved in membrane trafficking between the Golgi and the endoplasmic reticulum (ER) via interaction with the SNARE complex. Both overexpression and silencing of ZW10 disrupts the ER-Golgi transport system, as well as the morphology of the ER-Golgi intermediate compartment. This suggests that ZW10 plays a critical role in proper intercompartmental protein transport.

## CHROMOSOMAL LOCATION

Genetic locus: ZW10 (human) mapping to 11q23.2; Zw10 (mouse) mapping to 9 B.

#### SOURCE

ZW10 (C-17) is an affinity purified goat polyclonal antibody raised against a peptide mapping at the C-terminus of ZW10 of human origin.

## **STORAGE**

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

#### **PRODUCT**

Each vial contains 200  $\mu g$  IgG in 1.0 ml of PBS with <0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-66691 P, (100  $\mu$ g peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

## **APPLICATIONS**

ZW10 (C-17) is recommended for detection of ZW10 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

ZW10 (C-17) is also recommended for detection of ZW10 in additional species, including equine, canine, bovine and porcine.

Suitable for use as control antibody for ZW10 siRNA (h): sc-63259, ZW10 siRNA (m): sc-63260, ZW10 shRNA Plasmid (h): sc-63259-SH, ZW10 shRNA Plasmid (m): sc-63260-SH, ZW10 shRNA (h) Lentiviral Particles: sc-63259-V and ZW10 shRNA (m) Lentiviral Particles: sc-63260-V.

Molecular Weight of ZW10: 85 kDa.

## **RECOMMENDED SECONDARY REAGENTS**

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

## **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

# **PROTOCOLS**

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
