

CA VB (M-60): sc-67329

BACKGROUND

Carbonic anhydrases (CAs) are members of a large family of zinc metalloenzymes responsible for catalyzing the reversible hydration of carbon dioxide. CAs show extensive diversity in their distribution and subcellular localization. They are involved in a variety of biological processes, including calcification, bone resorption, respiration, acid-base balance and the formation of aqueous humor, saliva, gastric juice and cerebrospinal fluid. CA VB, also known as carbonate dehydratase VB, is one of two isoforms of CA V. It localizes to the mitochondria and is involved in metabolic processes. CA VB is predominantly expressed in heart, pancreas, lung, placenta, kidney and skeletal muscle. It exhibits highest homology with family member CA VA (the second isoform of CA V); however, unlike CA VA, it is not expressed in the liver, suggesting that it plays a significantly different physiological role.

CHROMOSOMAL LOCATION

Genetic locus: CA5B (human) mapping to Xp22.2; Car5b (mouse) mapping to X F5.

SOURCE

CA VB (M-60) is a rabbit polyclonal antibody raised against amino acids 1-60 mapping at the N-terminus of CA VB of mouse origin.

PRODUCT

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

APPLICATIONS

CA VB (M-60) is recommended for detection of CA VB of mouse, rat and, to a lesser extent, human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for CA VB siRNA (h): sc-62034, CA VB siRNA (m): sc-62035, CA VB shRNA Plasmid (h): sc-62034-SH, CA VB shRNA Plasmid (m): sc-62035-SH, CA VB shRNA (h) Lentiviral Particles: sc-62034-V and CA VB shRNA (m) Lentiviral Particles: sc-62035-V

Molecular Weight of CA VB precursor: 36 kDa.

Molecular Weight of mature CA VB: 32 kDa.

Positive Controls: rat liver extract: sc-2395, NIH/3T3 whole cell lysate: sc-2210 or mouse liver extract: sc-2256.

DATA

CA VB (M-60): sc-67329. Western blot analysis of CA VB expression in c4 (A), NIH/3T3 (B) and K-562 (C) whole cell lysates and mouse liver (D), rat liver (E) and mouse kidney (F) tissue extracts.

STORAGE

Store at 4° C, ****DO NOT FREEZE****. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.
