# SANTA CRUZ BIOTECHNOLOGY, INC.

# CARD 8 (K-18): sc-68156

## BACKGROUND

Membrane-associated guanylate kinase (MAGUK) family members localize to the plasma membrane and function as molecular scaffolds for the assembly of multi-protein complexes. The MAGUK family includes several mammalian proteins, >such as postsynaptic proteins, GKAPs, the tight junction associated proteins (ZO-1-3), and the caspase-associated recruitment domain (CARD) proteins, all of which are related to the Drosophila tumor >suppressor discslarge (dlg) gene product. CARD 8, also designated >DACAR, NDPP1, TUCAN or CARDINAL, is a 431 amino acid protein that is expressed in the lung, ovary, testis and placenta. It regulates cellular responses controlled by NFkB activation and may play a key role in apoptosis and >chronic inflammatory disorders. CARD 8 binds to caspase-1 and negatively regulates its activity. CARD 8 interact with IKKy and FHL-2.

#### CHROMOSOMAL LOCATION

Genetic locus: CARD8 (human) mapping to 19q13.32.

# SOURCE

CARD 8 (K-18) is an affinity purified goat polyclonal antibody raised against a peptide mapping near the N-terminus of CARD 8 of human origin.

### PRODUCT

Each vial contains 200 µg lgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-68156 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

#### **APPLICATIONS**

CARD 8 (K-18) is recommended for detection of CARD 8 isoforms 1, 2 and 3 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for CARD 8 siRNA (h): sc-105180, CARD 8 shRNA Plasmid (h): sc-105180-SH and CARD 8 shRNA (h) Lentiviral Particles: sc-105180-V.

Molecular Weight of CARD 8: 49 kDa.

### **RECOMMENDED SECONDARY REAGENTS**

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

#### **STORAGE**

Store at 4° C. \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

#### **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

# **PROTOCOLS**

See our web site at www.scbt.com or our catalog for detailed protocols and support products.

MONOS Try CARD 8 (2108C2a): sc-81213, our highly Satisfation recommended monoclonal alternative to CARD 8 (K-18). Guaranteed
