

# Integrin $\alpha$ X (3H986): sc-71456

## BACKGROUND

Integrin  $\alpha$ X (CD11c, leukocyte surface antigen p150,95, CR4, Axb2) is a type 1 transmembrane protein that traditionally combines with  $\beta$ 2 chain to form a leukocyte-specific integrin known as inactivated-C3b (iC3b) receptor 4 (CR4). Integrin  $\alpha$ X/ $\beta$ 2 shares similar properties of the  $\alpha$ M/ $\beta$ 2 Integrin in mediating adherence of neutrophils and monocytes to stimulated endothelial cells and in phagocytosis of complement coated particles. Abnormal expression of Integrin  $\alpha$ X is characteristic of hairy cell leukemia (HCL) and is dependent upon activation of proto-oncogenes Ras and JunD. Proteins and DNA elements that influence transcription of Integrin  $\alpha$ X include Sp1 and Sp1-like factors, AP-1 family, C/EBP, Oct-2 and PU.1. Integrin  $\alpha$ X is present on monocyte derivative dendritic cells (DCs), macrophages and NK cells. Upon activation, DCs present in skin (Langerhans cells), lining of nose, lung, stomach, intestine and blood can migrate to lymphoid tissues and interact with T and B cells to initiate and shape the immune response.

## STORAGE

Store at 4° C, **\*\*DO NOT FREEZE\*\***. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.

## CHROMOSOMAL LOCATION

Genetic locus: Itgax (mouse) mapping to 7 F3.

## SOURCE

Integrin  $\alpha$ X (3H986) is a Armenian hamster monoclonal antibody raised against mouse spleen dendritic cells.

## PRODUCT

Each vial contains 200  $\mu$ g IgG in 1.0 ml PBS with < 0.1% sodium azide and 0.1% gelatin.

Integrin  $\alpha$ X (3H986) is available conjugated to either phycoerythrin (sc-71456 PE) or fluorescein (sc-71456 FITC), 200  $\mu$ g/ml, for WB (RGB), IF, IHC(P) and FCM.

## APPLICATIONS

Integrin  $\alpha$ X (3H986) is recommended for detection of Integrin  $\alpha$ X of mouse origin by immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and flow cytometry (1  $\mu$ g per 1 x 10<sup>6</sup> cells).

Suitable for use as control antibody for Integrin  $\alpha$ X siRNA (m): sc-35696, Integrin  $\alpha$ X shRNA Plasmid (m): sc-35696-SH and Integrin  $\alpha$ X shRNA (m) Lentiviral Particles: sc-35696-V.

Molecular Weight of Integrin  $\alpha$ X: 145 kDa.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

See **Integrin  $\alpha$ X (D-8): sc-398708** for Integrin  $\alpha$ X antibody conjugates, including AC, HRP, FITC, PE, and Alexa Fluor<sup>®</sup> 488, 546, 594, 647, 680 and 790.
