

## FAM70B (P-14): sc-84245

### BACKGROUND

FAM70B (family with sequence similarity 70, member B) is a 326 amino acid membrane protein that belongs to the FAM70 family. The gene that encodes FAM70B maps to human chromosome 13, which contains around 114 million base pairs and encodes roughly 400 genes. Key tumor suppressor genes on chromosome 13 include the breast cancer susceptibility gene, BRCA2, and the RB1 (retinoblastoma) gene. RB1 encodes a crucial tumor suppressor protein which, when defective, leads to malignant growth in the retina and has been implicated in a variety of other cancers. The gene SLITRK1, which is associated with Tourette syndrome, is on chromosome 13. As with most chromosomes, polysomy of part or all of chromosome 13 is deleterious to development and decreases the odds of survival. Trisomy 13, also known as Patau syndrome, is quite deadly and the few who survive past one year suffer from permanent neurologic defects, difficulty eating and vulnerability to serious respiratory infections.

### CHROMOSOMAL LOCATION

Genetic locus: FAM70B (human) mapping to 13q34; Fam70b (mouse) mapping to 8 A1.1.

### SOURCE

FAM70B (P-14) is an affinity purified rabbit polyclonal antibody raised against a peptide mapping within an internal region of FAM70B of human origin.

### PRODUCT

Each vial contains 100 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-84245 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

### APPLICATIONS

FAM70B (P-14) is recommended for detection of FAM70B of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for FAM70B siRNA (h): sc-77309, FAM70B shRNA Plasmid (h): sc-77309-SH and FAM70B shRNA (h) Lentiviral Particles: sc-77309-V.

Molecular Weight of FAM70B: 35 kDa.

Positive Controls: LADMAC whole cell lysate or KNRK whole cell lysate: sc-2214.

### DATA

FAM70B (P-14): sc-84245. Western blot analysis of FAM70B expression in LADMAC whole cell lysate.

### STORAGE

Store at 4° C, **\*\*DO NOT FREEZE\*\***. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

### RESEARCH USE

For research use only, not for use in diagnostic procedures.

### PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.

Try **FAM70B (E-4): sc-514100**, our highly recommended monoclonal alternative to FAM70B (P-14).
