

# WFDC6 (K-20): sc-86020

## BACKGROUND

Peptidases are enzymes that are responsible for hydrolyzing peptide bonds of polypeptide chains during protein catabolism. Protease inhibitors are important peptidase regulators which halt enzymatic function. The WAP (whey acidic protein) domain, also referred to as the WAP-type four-disulfide core domain, is a signature protein motif that contains eight cysteine residues which form disulfide bonds and may exhibit protease inhibitor activity. WAP domain-containing proteins are thought to function in the immune defense by cleaving microbial proteolytic enzymes in order to prevent tissue penetration and infection. WFDC6 (WAP four-disulfide core domain protein 6), also known as WAP6, is a 131 amino acid secreted protein that contains one WAP domain and one BPTI/Kunitz inhibitor domain. WFDC6 is ubiquitously expressed, however highest levels are found in testis, trachea and epididymis. A cluster of WAP genes, including WFDC6, exist on chromosome 20, suggesting they evolved by repeated duplications. There are two isoforms of WFDC6 that are produced as a result of alternative splicing events.

## CHROMOSOMAL LOCATION

Genetic locus: WFDC6 (human) mapping to 20q13.12.

## SOURCE

WFDC6 (K-20) is an affinity purified rabbit polyclonal antibody raised against a peptide mapping within an internal region of WFDC6 of human origin.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PRODUCT

Each vial contains 100 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-86020 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

## APPLICATIONS

WFDC6 (K-20) is recommended for detection of WFDC6 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000); non cross-reactive with isoform WFDC6-2.

Suitable for use as control antibody for WFDC6 siRNA (h): sc-76923, WFDC6 shRNA Plasmid (h): sc-76923-SH and WFDC6 shRNA (h) Lentiviral Particles: sc-76923-V.

Molecular Weight of WFDC6: 15 kDa.

## RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-rabbit IgG-HRP: sc-2004 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible goat anti-rabbit IgG-HRP: sc-2030 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use goat anti-rabbit IgG-FITC: sc-2012 (dilution range: 1:100-1:400) or goat anti-rabbit IgG-TR: sc-2780 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

## STORAGE

Store at 4° C, **\*\*DO NOT FREEZE\*\***. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.
