PRIC285 (Y-19): sc-86801

The Power to Question

BACKGROUND

PRIC285 (peroxisomal proliferator-activated receptor A-interacting complex 285 kDa protein), also known as PPAR γ DNA-binding domain-interacting protein 1 (PDIP1), is a 2649 amino acid nuclear helicase protein that may be a part of the peroxisome proliferator activated receptor α interacting (PRIC) complex. PRIC285 acts as a transcriptional co-activator for many nuclear receptors, such as RXR α , TR α 1, TR β 1, PPAR α and PPAR γ . PRIC285 contains a zinc finger and five LXXLL motifs, which are associated with protein-protein interactions during transcription regulation, however these motifs are not required for interaction with PPAR γ . PRIC285 is expressed in skeletal muscle, spleen, colon, liver, heart, pancreas, lung, kidney, placenta and peripheral blood lymphocytes. There are three isoforms of PRIC285 that are produced as a result of alternative splicing events.

STORAGE

Store at 4° C, **D0 NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

CHROMOSOMAL LOCATION

Genetic locus: PRIC285 (human) mapping to 20q13.33.

SOURCE

PRIC285 (Y-19) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of PRIC285 of human origin.

PRODUCT

Each vial contains 200 μg lgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-86801 P, (100 μg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

APPLICATIONS

PRIC285 (Y-19) is recommended for detection of PRIC285 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for PRIC285 siRNA (h): sc-76246, PRIC285 shRNA Plasmid (h): sc-76246-SH and PRIC285 shRNA (h) Lentiviral Particles: sc-76246-V.

Molecular Weight of PRIC285: 295/285/231 kDa.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
