

# C. abortus MOMP (4/11): sc-101594

## BACKGROUND

*Chlamydomonas abortus*, also known as *Chlamydia psittaci*, is a Gram-negative intracellular bacterium that colonizes in the placenta of animals causing abortion in the last term of gestation. An enzootic and zoonotic pathogen, *C. abortus* contains 961 genes arranged in a circularized structure, in which 842 genes are conserved with *Chlamydomonas caviae* and *Chlamydomonas pneumoniae*. *C. abortus* is a derivative of the group *Chlamydiales*, which is divided into four families, *Chlamydiaceae*, *Simkaniaceae*, *Parachlamydiaceae* and *Waddliaceae*. Host tropism and disease causation of *C. abortus* is due its composition of transmembrane helical proteins (TMH) and polymorphic membrane proteins (Pmp). *C. abortus* consists of a heat-resistant lipopolysaccharide (LPS), which is common to all *Chlamydiaceae* species.

## SOURCE

C. abortus MOMP (4/11) is a mouse monoclonal antibody raised against the S26/3 ovine isolate of *C. abortus* origin.

## PRODUCT

Each vial contains 200 µg IgG<sub>2b</sub> kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

C. abortus MOMP (4/11) is available conjugated to agarose (sc-101594 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-101594 HRP), 200 µg/ml, for WB, IHC(P) and ELISA; to either phycoerythrin (sc-101594 PE), fluorescein (sc-101594 FITC), Alexa Fluor® 488 (sc-101594 AF488), Alexa Fluor® 546 (sc-101594 AF546), Alexa Fluor® 594 (sc-101594 AF594) or Alexa Fluor® 647 (sc-101594 AF647), 200 µg/ml, for WB (RGB), IF, IHC(P) and FCM; and to either Alexa Fluor® 680 (sc-101594 AF680) or Alexa Fluor® 790 (sc-101594 AF790), 200 µg/ml, for Near-Infrared (NIR) WB, IF and FCM.

Alexa Fluor® is a trademark of Molecular Probes, Inc., Oregon, USA

## APPLICATIONS

C. abortus MOMP (4/11) is recommended for detection of native and denatured MOMP of *C. abortus* by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-IgGκ BP-HRP: sc-516102 or m-IgGκ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use m-IgGκ BP-FITC: sc-516140 or m-IgGκ BP-PE: sc-516141 (dilution range: 1:50-1:200) with UltraCruz® Mounting Medium: sc-24941 or UltraCruz® Hard-set Mounting Medium: sc-359850.

## SELECT PRODUCT CITATIONS

- Bautista, C.J., Montañó, S., Ramirez, V., Morales, A., Nathanielsz, P.W., Bobadilla, N.A. and Zambrano, E. 2016. Changes in milk composition in obese rats consuming a high-fat diet. *Br. J. Nutr.* 115: 538-546.

## STORAGE

Store at 4° C, \*\*DO NOT FREEZE\*\*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
