# Thrombospondin 2 (h2): 293T Lysate: sc-112804

The Power to Question

### **BACKGROUND**

The Thrombospondin proteins (TSP 1-4) compose a family of glycoproteins that are involved in cell-to-cell and cell-to-matrix signaling. These extracellular, cell-surface proteins form complexes of both homo- and heteromultimers. Thrombospondins play a role in development, aggregation of platelets, adhesion and migration of cells, and progression of cells through the growth cycle. Thrombospondin 1 is released from platelets in response to Thrombin stimulation and is a transient component of the extracellular matrix of developing and repairing tissues. Thrombospondin 2 shares a high degree of homology with Thrombospondin 1 and is thought to have overlapping but unique functions. Thrombospondin 3 is a developmentally regulated heparin binding protein. Thrombospondin 4 is neuronally expressed and stimulates neurite outgrowth.

# CHROMOSOMAL LOCATION

Genetic locus: THBS2 (human) mapping to 6q27.

### **PRODUCT**

Thrombospondin 2 (h2): 293T Lysate represents a lysate of human Thrombospondin 2 transfected 293T cells and is provided as 100  $\mu$ g protein in 200  $\mu$ l SDS-PAGE buffer.

## **STORAGE**

Store at -20 $^{\circ}$  C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## **APPLICATIONS**

Thrombospondin 2 (h2): 293T Lysate is suitable as a Western Blotting positive control for human reactive Thrombospondin 2 antibodies. Recommended use:  $10-20 \mu l$  per lane.

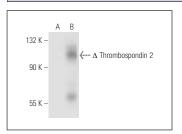

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

Thrombospondin 1/2 (D-9): sc-74538 is recommended as a positive control antibody for Western Blot analysis of enhanced human Thrombospondin 2 expression in Thrombospondin 2 transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

### **RECOMMENDED SUPPORT REAGENTS**

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-lgG $\kappa$  BP-HRP: sc-516102 or m-lgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker<sup>TM</sup> Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

### **DATA**

Thrombospondin 1/2 (D-9): sc-74538. Western blot analysis of Thrombospondin 2 expression in non-transfected: sc-117752 (**A**) and truncated human Thrombospondin 2 transfected: sc-112804 (**B**) 293T whole cell Ivsates.

## **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

# **PROTOCOLS**

See our web site at www.scbt.com for detailed protocols and support products.
