PCP-2 (F-3): sc-137064

BACKGROUND

Purkinje cells are densely branching neurons characteristic of the cerebellar cortex. Purkinje cell protein-2 (PCP-2 or L7) is a G protein regulator abundant in Purkinje cells and retinal bipolar neurons. PCP-2 belongs to a family of proteins containing a GoLoco or GPR (G protein regulatory) motif named for the Gαi/o interacting protein Loco, the Drosophila RGS12 homologue. PCP-2 protein interacts with Gαi/o family of G proteins to inhibit GDP release. This indicates that the colocalization and association of Gαi/o and PCP-2 in cerebellum may play a functional role in regions of synaptic activity, as well as neuronal differentiation. The Purkinje type calcium channels may be physiologically effectors of PCP-2 because they are the major voltage-dependent channels that modulate cell output and they are regulated by Gαi/o proteins. PCP-2 is only detected in higher vertebrates, suggesting that it may be a marker of more recent evolutionary development of cerebellar Purkinje cells.

CHROMOSOMAL LOCATION

Genetic locus: PCP2 (human) mapping to 19p13.2; Pcp2 (mouse) mapping to B A1.1.

SOURCE

PCP-2 (F-3) is a mouse monoclonal antibody raised against amino acids 1-60 mapping at the N-terminus of PCP-2 of human origin.

PRODUCT

Each vial contains 200 µg IgG2b, kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

PCP-2 (F-3) is available conjugated to agarose (sc-137064 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-137064 HRP), 200 µg/ml, for WB, IHC(P) and FCM; to either Alexa Fluor® 488 (sc-137064 AF488), Alexa Fluor® 546 (sc-137064 AF546), Alexa Fluor® 594 (sc-137064 AF594) or Alexa Fluor® 647 (sc-137064 AF647), 200 µg/ml, for WB (RGB), IF, IHC(P) and FCM; and to either Alexa Fluor® 680 (sc-137064 AF680) or Alexa Fluor® 790 (sc-137064 AF790), 200 µg/ml, for Near-Infrared (NIR) WB, IF and FCM.

Alexa Fluor® is a trademark of Molecular Probes, Inc., Oregon, USA.

APPLICATIONS

PCP-2 (F-3) is recommended for detection of PCP-2 of mouse, rat and human origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Molecular Weight of PCP-2: 16 kDa.

Positive Controls: rat cerebellum extract: sc-2398.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.
