BACKGROUND
IGFL2 (insulin growth factor-like family member 2) is a 119 amino acid secreted protein that belongs to the insulin-like growth factor (IGFL) family. Members of the IGFL family play an important role in prenatal growth, specifically in cellular energy metabolism during growth and development. Expressed in cerebellum, heart, placenta, spleen, stomach, testis and thymus, IGFL2 is a probable IGFRL1 cell membrane receptor ligand. Existing as two alternatively spliced isoforms, the gene encoding IGFL2 maps to human chromosome 19q13.32. Chromosome 19 consists of over 63 million bases, houses approximately 1,400 genes and is recognized for having the greatest gene density of the human chromosomes. It is the genetic home for a number of immunoglobulin (Ig) superfamily members, including the killer cell and leukocyte Ig-like receptors, a number of ICAMs, the CEACAM and PSG families, and Fc receptors (FcRs).

REFERENCES

CHROMOSOMAL LOCATION
Genetic locus: IGFL2 (human) mapping to 19q13.32.

SOURCE
IGFL2 (E-13) is an affinity purified goat polyclonal antibody raised against a peptide mapping within an internal region of IGFL2 of human origin.

PRODUCT
Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. Blocking peptide available for competition studies, sc-168138 P, 100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA.

APPLICATIONS
IGFL2 (E-13) is recommended for detection of IGFL2 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000); non cross-reactive with other IGFL family members.

Suitable for use as control antibody for IGFL2 siRNA (h): sc-97094, IGFL2 shRNA Plasmid (h): sc-97094-SH and IGFL2 shRNA (h) Lentiviral Particles: sc-97094-V.

Molecular Weight of IGFL2 isoforms 1/2: 13/14 kDa.

RECOMMENDED SECONDARY REAGENTS
To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use donkey anti-goat IgG-HRP: sc-2020 (dilution range: 1:2000-1:100,000) or Cruz Marker™ compatible donkey anti-goat IgG-HRP: sc-2033 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2033 and Western Blotting Luminol Reagent: sc-2048. 2) Immunofluorescence: use donkey anti-goat IgG-FITC: sc-2024 (dilution range: 1:100-1:400) or donkey anti-goat IgG-TR: sc-2783 (dilution range: 1:100-1:400) with UltraCruz™ Mounting Medium: sc-24941.

STORAGE
Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

RESEARCH USE
For research use only, not for use in diagnostic procedures.

PROTOCOLS
See our web site at www.scbt.com or our catalog for detailed protocols and support products.
