Super Tet/T-Toxol w/Havlogen
Tetanus Toxoid

Intervet

Tetanus Toxoid

Purified Tetanus Toxoid for vaccination of healthy horses, cattle, swine and sheep against Tetanus.

DOSE: For primary immunization, aseptically inject horses, cattle and swine with 1 ml or sheep with 0.5 ml intramuscularly and repeat the dose in 3 to 4 weeks. A dose should be administered annually.

CAUTION: Store at 35° to 45°F (2° to 7°C). Shake well before using. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. Local reactions may occur if this product is given subcutaneously. Inject deep into the muscle only. Injury should be followed by a booster dose of a vaccine containing Tetanus Toxoid. Consult your veterinarian regarding indications and precautions for the use of tetanus antitoxin. Anaphylactoid reactions may occur.

ANTIDOTE: Epinephrine. Contains thimerosal as preservative.

Purified tetanus toxoid adsorbed with Havlogen*.

*Adjuvant – U.S. Patent Nos. 3,790,665 and 3,919,411.
