

UltraCruz Equine Sand Clear (Psyllium)[™]

keep things moving

Our Psyllium pellets absorb moisture to soften the stool and add bulk, thereby supporting the digestive health of your horse.

WHAT IS SAND COLIC?

Colic is the number one cause of death in horses, aside from old age. Sand Colic occurs when ingested sand builds up in the intestines and forms a blockage. If left untreated, this blockage can get to such a point that it completely obstructs a loop of the intestines. Pressure is built up, and the sand is either pushed through or forces the intestine to rupture. This intestinal rupturing is always fatal. However, Sand Colic is one of the most preventable conditions in horses. By maintaining a regular feeding and exercise regime, ensuring constant access to clean water, and supplementing with UltraCruz Equine Sand Clear (Psyllium)[™], you can help to prevent colic and keep your horse's digestive tract healthy and sand-free.

UltraCruz Equine Sand Clear (Psyllium)[™]

Aids in Digestive Health

Psyllium is a soluble fiber derived from the husk of a shrub-like herb named Plantago Ovata. These little husks have a myriad of positive digestive health effects, from relieving constipation and diarrhea, to helping treat and prevent sand colic. When psyllium husks combine with water, they form a gelatinous mass that flows through the horse's intestinal tract. This mass helps to keep waste moving through the intestines and prevents blockages (such as those caused by sand), which keeps your horse's intestinal tract flowing regularly, and their digestive health at an optimal level.

That's the UltraCruz[™] Advantage!

INGREDIENTS (per recommended daily dosage—1 scoop, 68 g):

Psyllium Husk (50 g), Water, Molasses, Soybean Oil, Dextrose, Natural Apple Powder, Citric Acid and Condensed Lignosulfonate (pellet binder)

RECOMMENDATIONS FOR USE:

Feed 1 level scoop (68 g) once daily for 3–7 consecutive days. Servings based on an average horse weight of 1,000 pounds. Not recommended to exceed 7 consecutive days in a 30 day time period. Give less than 1 scoop to ponies, yearlings and foals; more to larger horses and draft breeds.

Available only from Santa Cruz Animal Health.
