HGD (C-5): sc-376276

**BACKGROUND**

HGD (homogentisate 1,2-dioxygenase), also known as HGO (homogentisate oxygenase), is a 445 amino acid protein that belongs to the homogentisate dioxygenase family and is involved in the pathway of amino acid degradation. Expressed at high levels in kidney, colon, liver, prostate and small intestine, HGD uses iron as a cofactor to catalyze the oxygen-dependent conversion of homogentisate to 4-maleylacetoacetate, a reaction that is the fourth step in the creation of L-phenylalanine from fumarate and acetoacetic acid. Defects in the gene encoding HGD are the cause of alkaptonuria (AKU), an autosomal recessive disorder that is characterized by urine that turns dark on standing and alcalizarin, black ochronotic pigmentation of cartilage and collagenous tissues and spine arthritis.

**REFERENCES**

**CHROMOSOMAL LOCATION**

Genetic locus: HGD (human) mapping to 3q13.33; Hgd (mouse) mapping to 16 B3.

**SOURCE**

HGD (C-5) is a mouse monoclonal antibody raised against amino acids 97-229 mapping near the N-terminus of HGD of human origin.

**PRODUCT**

Each vial contains 200 µg IgGκ kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. HGD (C-5) is available conjugated to agarose (sc-376276 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-376276 HRP), 200 µg/ml, for WB, IHCp and ELISA; to either phycoerythrin (sc-376276 PE), fluorescein (sc-376276 FITC), Alexa Fluor® 488 (sc-376276 AF488), Alexa Fluor® 546 (sc-376276 AF546), Alexa Fluor® 594 (sc-376276 AF594) or Alexa Fluor® 647 (sc-376276 AF647), 200 µg/ml, for WB (RGB), IF, IHCp and FCM; and to either Alexa Fluor® 680 (sc-376276 AF680) or Alexa Fluor® 790 (sc-376276 AF790), 200 µg/ml, for Near-Infrared (NIR) WB, IF and FCM.

**APPLICATIONS**

HGD (C-5) is recommended for detection of HGD of mouse, rat and human origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for HGD siRNA (h): sc-75249, HGD siRNA (m): sc-75250, HGD shRNA Plasmid (h): sc-75249-SH, HGD shRNA Plasmid (m): sc-75250-SH, HGD shRNA (h) Lentiviral Particles: sc-75249-V and HGD shRNA (m) Lentiviral Particles: sc-75250-V.

**RECOMMENDED SUPPORT REAGENTS**

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-IgGκ BP-HRP: sc-516102 or m-IgGκ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml).

**DATA**

HGD (C-5): sc-376276. Western blot analysis of HGD expression in human liver (A), mouse liver (B) and human kidney (C) tissue extracts.

**STORAGE**

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

**RESEARCH USE**

For research use only, not for use in diagnostic procedures.
