TRAP (D-3): sc-376875

**BACKGROUND**

Tartrate-resistant acid phosphatase (TRAP, ACP5) is an iron containing glycoprotein that catalyzes the conversion of orthophosphoric monoester to alcohol and orthophosphate. TRAP is the most basic of the acid phosphatases and is the only form not inhibited by L-tartrate. TRAP is a relatively minor lysosomal enzyme which may be activated in certain pathologies such as Hodgkin’s disease and B- and T-cell leukemias. Receptor activator of NFκB ligand (RANKL) plays an essential role in osteoclast differentiation and activation by increasing the expression of protease osteoclast markers such as TRAP. TRAP has collagenolytic activity and plays a major role in ligament degradation.

**CHROMOSOMAL LOCATION**

Genetic locus: ACP5 (human) mapping to 19p13.2.

**SOURCE**

TRAP (D-3) is a mouse monoclonal antibody raised against amino acids 24-323 mapping at the C-terminus of TRAP of human origin.

**PRODUCT**

Each vial contains 200 μg IgG1 kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin. TRAP (D-3) is available conjugated to agarose (sc-376875 AC), 500 μg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-376875 HRP), 200 μg/ml, for WB, IHC(P) and ELISA; to either phycoerythrin (sc-376875 PE), fluorescein (sc-376875 FITC), Alexa Fluor® 488 (sc-376875 AF488), Alexa Fluor® 546 (sc-376875 AF546), Alexa Fluor® 594 (sc-376875 AF594) or Alexa Fluor® 647 (sc-376875 AF647), 200 μg/ml, for WB (RGB), IF, IHC(P) and FCM; and to either Alexa Fluor® 680 (sc-376875 AF680) or Alexa Fluor® 790 (sc-376875 AF790), 200 μg/ml, for Near-Infrared (NIR) WB, IF and FCM.

Alexa Fluor® is a trademark of Molecular Probes, Inc., Oregon, USA.

**APPLICATIONS**

TRAP (D-3) is recommended for detection of TRAP of human origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 μg per 100-500 μg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Suitable for use as control antibody for TRAP siRNA (h): sc-44164, TRAP shRNA Plasmid (h): sc-44164-SH and TRAP shRNA (h) Lentiviral Particles: sc-44164-V.

Molecular Weight of TRAP: 34 kDa.

Positive Controls: TRAP (h): 293T Lysate: sc-111796.

**STORAGE**

Store at 4°C, *DO NOT FREEZE*. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

**RESEARCH USE**

For research use only, not for use in diagnostic procedures.
