BACKGROUND

The NDP (Norrie disease protein) gene encodes the secreted NORRIN protein. Mutations in this gene lead to Norrie disease, a rare X-linked disorder characterized by congenital blindness, deafness and mental retardation. X-linked familial exudative vitreoretinopathy (XL-FEVR), an ocular disorder characterized by a failure of peripheral retinal vascularization, is also associated with mutations in the NDP gene. NORRIN utilizes the Wnt/Frizzled signaling pathway and plays a role in vascular development. Research indicates that it induces growth of ocular capillaries and that pharmacologic regulation of NORRIN may be useful for treatment of the vascular abnormalities associated with Norrie disease or other vascular disorders of the retina.

REFERENCES

CHROMOSOMAL LOCATION

Genetic locus: NDP (human) mapping to Xp11.3; Ndp (mouse) mapping to X A1.2.

SOURCE

NORRIN (B-8) is a mouse monoclonal antibody raised against amino acids 1-133 representing full length NORRIN of human origin.

PRODUCT

Each vial contains 200 µg IgG2b kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No SDS required.

APPLICATIONS

NORRIN (B-8) is recommended for detection of NORRIN of mouse, rat and human origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30:1:3000).

Suitable for use as control antibody for NORRIN siRNA (h): sc-61217, NORRIN siRNA (m): sc-61218, NORRIN shRNA Plasmid (h): sc-61217-SH, NORRIN shRNA Plasmid (m): sc-61218-SH, NORRIN shRNA (h) Lentiviral Particles: sc-61217-V and NORRIN shRNA (m) Lentiviral Particles: sc-61218-V.

Molecular Weight of NORRIN: 15 kDa.

Positive Controls: Mouse eye tissue extract and rat eye tissue extract.

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

DATA

For research use only, not for use in diagnostic procedures.
