**BACKGROUND**

Sucrase-Isomaltase (SI) is a type II brush border membrane protein that plays an important role in the final stage of carbohydrate digestion. Sucrase-Isomaltase is a disaccharidase that catalyzes the hydrolysis of dietary sucrose and maltose and other products of starch digestion. The high degree of amino acid homology between isomaltase and sucrose indicates that the Sucrase-Isomaltase protein was evolved by partial gene duplication. The Sucrase-Isomaltase precursor is proteolytically cleaved when exposed to pancreatic proteases in the intestinal lumen and localizes to the apical membrane of adult intestinal enterocytes along the intestinal crypt-villus axis. Sucrase-Isomaltase protein deficiency results in osmotic diarrhea due to an inability to hydrolyze intestinal disaccharides into component monosaccharides. Congenital Sucrase-Isomaltase Deficiency (CSID) is an autosomal recessive human disorder characterized by reduced activities of Sucrase-Isomaltase.

**REFERENCES**

**CHROMOSOMAL LOCATION**

Genetic locus: SI (human) mapping to 3q26.1; Sis (mouse) mapping to 3 E3.

**SOURCE**

Sucrase-Isomaltase (A-12) is a mouse monoclonal antibody raised against amino acids 839-961 mapping within an internal region of Sucrase-Isomaltase of human origin.

**PRODUCT**

Each vial contains 200 µg IgG2a kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Sucrase-Isomaltase (A-12) is available conjugated to agarose (sc-393424 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-393424 HRP), 200 µg/ml, for WB, HClP and ELISA; to either phycoerythrin (sc-393424 PE), fluorescein (sc-393424 FITC), Alexa Fluor® 488 (sc-393424 AF488), Alexa Fluor® 546 (sc-393424 AF546), Alexa Fluor® 594 (sc-393424 AF594) or Alexa Fluor® 647 (sc-393424 AF647), 200 µg/ml, for WB (RGB), IF, HClP and FCM; and to either Alexa Fluor® 680 (sc-393424 AF680) or Alexa Fluor® 790 (sc-393424 AF790), 200 µg/ml, for Neared-NIR (NIR) WB, IF and FCM.

Alexa Fluor® is a trademark of Molecular Probes, Inc., Oregon, USA.

**STORAGE**

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

**APPLICATIONS**

Sucrase-Isomaltase (A-12) is recommended for detection of Sucrase-Isomaltase of mouse, rat and human origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

Molecular Weight of Sucrase-Isomaltase precursor: 200 kDa.

Molecular Weight of mature Sucrase-Isomaltase: 143 kDa.

Positive Controls: human small intestine extract: sc-364225, Caco-2 cell lysate: sc-2262 or COLO 320DM cell lysate: sc-2226.

**DATA**

Sucrase-Isomaltase (A-12): sc-393424. Western blot analysis of Sucrase-Isomaltase expression in human small intestine tissue extract (A) and Caco-2 (B) and COLO 320DM (C) whole cell lysates.

Sucrase-Isomaltase (A-12): sc-393424. Immunoperoxidase staining of formalin fixed, paraffin-embedded human small intestine tissue showing apical membrane and cytoplasmic staining of glandular cells (A). Immunoperoxidase staining of formalin fixed, paraffin embedded human duodenum tissue showing apical membrane and cytoplasmic staining of glandular cells (B).
