**EB1 (1A11/4): sc-47704**

**BACKGROUND**

EB1 (end-binding protein 1), also known as microtubule-associated protein RP/E4 family member 1 (MAPRE1) or APC-binding protein EB1, may influence tumorigenesis of colorectal cancers and proliferative control of normal cells. EB1 belongs to the intermediate/early gene family, involved in the signal transduction cascade downstream of the T cell receptor (TRC). Colorectal cancer is caused by the pathologic transformation of normal colonic epithelium to an adenomatous polypl, which can become an invasive cancer. APC (adenomatous polyposis coli) is a tumor suppressor gene, the mutation of which is one of the earliest events in colorectal carcinogenesis. A majority of the mutations result in the loss of the carboxy terminus of APC. EB1 has been shown to bind to the carboxy terminal region of APC, which implicates EB1 in APC suppression of colonic cancer. EB1 overexpression may play a role in the development of human esophageal squamous cell carcinoma by affecting APC function and activating the β-catenin/TCF pathway.

**CHROMOSOMAL LOCATION**

Genetic locus: MAPRE1 (human) mapping to 20q11.21.

**SOURCE**

EB1 (1A11/4) is a mouse monoclonal antibody raised against EB1 ΔC1 mutant.

**PRODUCT**

Each vial contains 200 µg IgG₂k kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

EB1 (1A11/4) is available conjugated to agarose (sc-47704 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-47704 HRP), 200 µg/ml, for WB, IHC/P and ELISA; to either phycoerythrin (sc-47704 PE), fluorescein (sc-47704 FITC), Alexa Fluor® 488 (sc-47704 AF488), Alexa Fluor® 546 (sc-47704 AF546), Alexa Fluor® 594 (sc-47704 AF594) or Alexa Fluor® 647 (sc-47704 AF647), 200 µg/ml, for WB (RGB), IF, IHC/P and FCM; and to either Alexa Fluor® 680 (sc-47704 AF680) or Alexa Fluor® 790 (sc-47704 AF790), 200 µg/ml, for Near-Infrared (NIR) WB, IF and FCM.

Alexa Fluor® is a trademark of Molecular Probes, Inc., Oregon, USA.

**APPLICATIONS**

EB1 (1A11/4) is recommended for detection of EB1 of human, canine and monkey origin by Western Blotting (starting dilution 1:100, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50:1:500) and immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50:1:500). Suitable for use as control antibody for EB1 siRNA (h): sc-35258, EB1 shRNA Plasmid (h): sc-35258-SH and EB1 shRNA (h) Lentiviral Particles: sc-35258-V.

Molecular Weight of EB1: 30-38 kDa.

Positive Controls: Jurkat whole cell lysate: sc-2204, Ramos cell lysate: sc-2216 or HeLa whole cell lysate: sc-2200.

**STORAGE**

Store at 4°C, **“DO NOT FREEZE”**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

**DATA**

![EB1 (1A11/4): sc-47704. Western blot analysis of EB1 expression in HEK293 (A), Jurkat (B), Ramos (C), A-431 (D) and HeLa (E) whole cell lysates and human brain tissue extract (F).](image)
