**BACKGROUND**

P450 enzymes constitute a family of monooxygenase enzymes that are involved in the metabolism of a wide array of endogenous and xenobiotic compounds. There are currently 57 known active cytochrome P450 (CYP) genes and 58 known pseudogenes present in the human genome. CYP2R1 is a 501 amino acid protein which belongs to the CYP2 family of cytochrome P450 proteins. These proteins are usually involved in the metabolism of foreign compounds. CYP2R1 acts as a major vitamin D 25-hydroxylase. A homozygous mutation in the CYP2R1 gene eliminates the vitamin D3 25-hydroxylase activity of the CYP2R1 protein, causing 25-hydroxyvitamin D3 deficiency. Manifestations of 25-hydroxyvitamin D3 deficiency include abnormally low plasma levels of 25-hydroxyvitamin D3 and various symptoms of vitamin D deficiency, including skeletal abnormalities, hypophosphatemia and hypocalcemia.

**CHROMOSOMAL LOCATION**

Genetic locus: CYP2R1 (human) mapping to 11p15.2; Cyp2r1 (mouse) mapping to 7 F1.

**SOURCE**

CYP2R1 (C-15) is an affinity purified goat polyclonal antibody raised against a peptide mapping to the C-terminus of CYP2R1 of human origin.

**PRODUCT**

Each vial contains 200 µg IgG in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Blocking peptide available for competition studies, sc-48985 P, (100 µg peptide in 0.5 ml PBS containing < 0.1% sodium azide and 0.2% BSA).

**APPLICATIONS**

CYP2R1 (C-15) is recommended for detection of CYP2R1 of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation (2-10 µg per 100-500 µg of total protein), immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and solid phase ELISA (starting dilution 1:30, dilution range 1:30-1:3000).

CYP2R1 (C-15) is also recommended for detection of CYP2R1 in additional species, including equine, canine, bovine, porcine and avian.

Suitable for use as control antibody for CYP2R1 siRNA (h): sc-60481, CYP2R1 siRNA (m): sc-60482, CYP2R1 shRNA Plasmid (h): sc-60481-SH, CYP2R1 shRNA Plasmid (m): sc-60482-SH, CYP2R1 shRNA (h) Lentiviral Particles: sc-60481-V and CYP2R1 shRNA (m) Lentiviral Particles: sc-60482-V.

Molecular Weight of CYP2R1: 57 kDa.

Positive Controls: KNRK whole cell lysate: sc-2214 or NCI-H460 whole cell lysate: sc-384235.

**STORAGE**

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

**RESEARCH USE**

For research use only, not for use in diagnostic procedures.

**DATA**

CYP2R1 (C-15): sc-48985. Western blot analysis of CYP2R1 expression in KNRK (A) and NCI-H460 (B) whole cell lysates.

CYP2R1 (C-15): sc-48985. Immunoperoxidase staining of formalin fixed, paraffin-embedded human vulva/anal skin tissue showing cytoplasmic and nuclear staining of epithelial cells.
