BACKGROUND

Hepatitis B virus (Hep B or HBV) infection can result in lifelong infection, cirrhosis (scarring) of the liver, liver cancer, liver failure and death. Hep B infection is also associated with a 100-fold increased risk of hepatocellular carcinoma and currently infects over 250 million people worldwide. Hep B has a partially double stranded 3.2 kilobase DNA genome which contains four open reading frames, one of which encodes a 154 amino acid protein called the HBx protein. Hepatitis B surface antigen (Hep B HBsAg) is a protein antigen produced by the hepatitis B virus. When in the blood, HBsAg is one of the earliest markers of infection with Hep B, appearing even before symptoms occur.

REFERENCES

SOURCE

Hep B HBsAg (1023) is a mouse monoclonal antibody raised against recombinant Hep B HBsAg.

PRODUCT

Each vial contains 200 µg IgG1 kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

Hep B sAg (1023) is available conjugated to agarose (sc-53299 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-53299 HRP), 200 µg/ml, for WB, IHC(P) and ELISA; and to either phycocyanin (sc-53299 PE), fluorescein (sc-53299 FITC), Alexa Fluor® 488 (sc-53299 AF488) or Alexa Fluor® 647 (sc-53299 AF647), 200 µg/ml, for IF, IHC(P) and FCM.

STORAGE

Store at 4° C. **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

APPLICATIONS

Hep B sAg (1023) is recommended for detection of surface antigen of Hep B origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000) and immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)].

Molecular Weight of Hep B sAg: 28 kDa.

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

1. Western Blotting: use m-IgGκ BP-HRP: sc-516102 or m-IgGκ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048.
2. Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml).

DATA

Hep B sAg (1023): sc-53299. Western blot analysis of recombinant hepatitis B surface antigen.
