Background
Mucin-like membrane glycoproteins contain many serine and threonine residues, which carry large amounts of O-linked glycans, forcing the molecule into an extended structure. Endomucin, also known as EMCN or Mucin-14, is a 261 amino acid protein which contains a transmembrane sequence and multiple glycosylation sites. Human Endomucin, which is highly expressed in vascular tissues such as heart, kidney and lung, exists as both an unprocessed precursor peptide and as a 241 amino acid processed protein, known as Endomucin 2. Mouse Endomucin is an endothelial antigen found in venous endothelium, as well as capillaries, but not on arterial endothelium. Endomucin expression is increased while endothelial cells are proliferating or are stimulated by tumor-conditioned media or specific angiogenic factors such as bFGF (basic fibroblast growth factor) and TNFα. Overexpression of Endomucin inhibits adhesion and aggregation of hematopoietic cells, suggesting that Endomucin may play a role in detachment of hematopoietic cells from endothelium during early hematopoiesis.

Chromosomal Location
Genetic locus: Emcn (mouse) mapping to 3 G3.

Source
Endomucin (V.7C7) is a rat monoclonal antibody raised against bEND.3 endothelioma of mouse origin.

Product
Each vial contains 200 µg IgG2a in 1.0 ml of PBS with <0.1% sodium azide and 0.1% gelatin.

Endomucin (V.7C7) is available conjugated to agarose (sc-65495 AC), 500 µg/0.25 ml agarose in 1 ml, for IP; to HRP (sc-65495 HRP), 200 µg/ml, for WB, (HCPI) and ELISA; to either phycoerythrin (sc-65495 PE), fluorescein (sc-65495 FITC), Alexa Fluor® 488 (sc-65495 AF488), Alexa Fluor® 546 (sc-65495 AF546), Alexa Fluor® 594 (sc-65495 AF594) or Alexa Fluor® 647 (sc-65495 AF647), 200 µg/ml, for WB (RGB), IF, IHQ (P) and FCM; and to either Alexa Fluor® 680 (sc-65495 AF680) or Alexa Fluor® 790 (sc-65495 AF790), 200 µg/ml, for Near-Infrared (NIR) WB, IF and FCM.

Applications
Endomucin (V.7C7) is recommended for detection of Endomucin of mouse and rat origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500), immunohistochemistry (including paraffin-embedded sections) (starting dilution 1:50, dilution range 1:50-1:500) and flow cytometry [1 µg per 1 x 10^6 cells]; not recommended for detection of human Endomucin.

Suitable for use as control antibody for Endomucin shRNA (m): sc-43155, Endomucin shRNA Plasmid (m): sc-43155-SH and Endomucin shRNA (m) Lentiviral Particles: sc-43155-V.

Molecular Weight of Endomucin: 80 kDa.

Storage
Store at 4°C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.
