Integrin α6 (3H1512): sc-71423

BACKGROUND
Integrins are heterodimers composed of noncovalently associated transmembrane α and β subunits. The 16 α and 8 β subunits heterodimerize to produce more than 20 different receptors. Most integrin receptors bind ligands that are components of the extracellular matrix, including Fibronection, collagen and Vitronectin. Certain integrins can also bind to soluble ligands such as Fibrinogen, or to counterreceptors on adjacent cells such as the intracellular adhesion molecules (ICAMs), leading to aggregation of cells. Ligands serve to cross-link or cluster integrins by binding to adjacent integrin receptors; both receptor clustering and ligand occupancy are necessary for the activation of integrin-mediated responses. In addition to mediating cell adhesion and cytoskeletal organization, integrins function as signaling receptors. Signals transduced by integrins play a role in many biological processes, including cell growth, differentiation, migration and apoptosis.

REFERENCES

CHROMOSOMAL LOCATION

SOURCE
Integrin α6 (3H1512) is a mouse monoclonal antibody raised against Integrin α6/β4 from A-431 cells of human origin.

PRODUCT
Each vial contains 200 µg IgG κ, kappa light chain in 1.0 ml of PBS with <0.1% sodium azide and 0.1% gelatin.

Integrin α6 (3H1512) is available conjugated to either phycoerythrin (sc-71423 PE) or fluorescein (sc-71423 FITC), 200 µg/ml, for WB (RGB), IF, IHC(P) and FCM.

STORAGE
Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

APPLICATIONS
Integrin α6 (3H1512) is recommended for detection of Integrin α6 of human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000), immunoprecipitation [1-2 µg per 100-500 µg of total protein (1 ml of cell lysate)], immunofluorescence (starting dilution 1:50, dilution range 1:50-1:500) and flow cytometry (1 µg per 1 x 10^6 cells).

Suitable for use as control antibody for Integrin α6 siRNA (h): sc-43129, Integrin α6 shRNA Plasmid (h): sc-43129-SH and Integrin α6 shRNA (h) Lentiviral Particles: sc-43129-V.

Molecular Weight of Integrin α6 proform: 140 kDa.

Molecular Weight of Integrin α6 heavy chain: 120 kDa.

Positive Controls: human platelet extract: sc-363773, DU 145 cell lysate: sc-2268 or Hep G2 cell lysate: sc-2227.

RECOMMENDED SUPPORT REAGENTS
To ensure optimal results, the following support reagents are recommended:
